Abstracts

Electron Beam technology can modify the physical, chemical, molecular and biological properties of materials and products, improving their usefulness and enhancing their value.

Electron beam accelerator (E-beam Accelerator) is widely used for industrial applications such as surface curing, crosslinking of wires and cables and sterilization/ decontamination of pharmaceutical products. The energy of the electron beam determines the type of applications. This is due to the penetration power of the electron that is limited by the energy.

According to our (Global Info Research) latest study, the global E-beam Accelerator market size was valued at US$ 325 million in 2023 and is forecast to a readjusted size of USD 558 million by 2030 with a CAGR of 8.1% during review period.
