Flat Steel Products, also known as flat products, are a type of steel made by rolling or sheeting, with a certain range of sizes and thicknesses.

Flat Steel generally includes medium and thick plates, cut plates, steel coils, strip steel, etc.

According to its processing technology, it can be further divided into three categories: hot-rolled steel, cold-rolled steel and coated steel.

Among them, hot-rolled steel is mainly used in industries such as automobiles, construction and mechanical engineering; cold-rolled steel is mainly used in the manufacture of household appliances with higher precision requirements; coated steel is coated with aluminum and zinc to further enhance the corrosion resistance of the material.

Globally, steel production is mainly distributed in Asia Pacific, North America and Europe. Core enterprises include China Baowu Group, ArcelorMittal, Ansteel Group, Nippon Steel Corporation, Shagang Group, POSCO, HBIS Group, Jianlong Group, Shougang Group, Tata Steel, etc. Among them, the world's top 5 enterprises account for about 20% of the market share, and the steel market is relatively fragmented.
