Abstracts

The global air ionizers market size was valued at USD 1.6 billion in 2025 and is projected to grow from USD 1.7 billion in 2026 to USD 2.5 billion by 2033, at a CAGR of 6.1% from 2026 to 2033. North America dominated the market, accounting for a revenue share of 36.5% in 2025. Growing concerns about airborne particulate matter, allergens, and other indoor pollutants are prompting households, offices, healthcare facilities, and commercial buildings to adopt air-cleaning technologies to reduce suspended particles.

Expansion of air-quality management in commercial and institutional buildings is fueling the market. Offices, schools, hospitality facilities, and healthcare environments are increasingly incorporating air-treatment equipment into broader indoor environmental management practices. Air ionizers can be integrated into existing heating, ventilation, and air-conditioning systems or deployed as standalone units, supporting their use across different building configurations.
