Abstracts

The global construction films market size was valued at USD 19.6 billion in 2025 and is projected to grow from USD 20.6 billion in 2026 to USD 29.6 billion in 2033, at a CAGR of 5.3% from 2026 to 2033. Asia Pacific dominated the market, accounting for a revenue share of 48.0% in 2025. Construction films are widely used in residential, commercial, and infrastructure projects for moisture protection, temporary surface protection, concrete curing, vapor barriers, and weatherproofing during construction activities.

Rapid urbanization, infrastructure development, and increasing investments in residential and commercial construction continue to drive demand for construction films worldwide. The growing adoption of prefabricated construction methods and stringent building quality standards are further increasing the use of protective films to improve construction efficiency and safeguard building materials during installation. For instance, in May 2025, in May 2025, JPFL Films announced the installation of new BOPP, PET, and CPP film production lines at its Nashik facility. The expansion is intended to strengthen the company's manufacturing capabilities and support growing demand across its film product portfolio.

Increasing emphasis on durable building materials and sustainable construction practices is further supporting market growth. Construction films are increasingly used

as moisture barriers, vapor control layers, and concrete curing films to improve construction quality and material performance. Meanwhile, manufacturers are expanding the availability of recyclable and resource-efficient film solutions to align with evolving environmental regulations and green building requirements, creating new growth opportunities for the market.

Global Construction Films Market Report Segmentation

This report forecasts revenue growth at global, regional, and country levels and analyzes the latest industry trends in each of the sub-segments from 2021 to 2033. For this study, Grand View Research has segmented the global construction films market report based on product, resin type, application, function, end use, distribution channel, and region.
