Sterile Filtration Market by Type (Cartridge Filters, Angioplasty Balloons, Capsule Filters, Membranes, Syringe Filters, and Others), Membrane Type (PVDF, PES, Nylon, PTFE, and Others), Application, End-User, and Geography – Global Forecast to 2026

Sterile filtration is the process of elimination of microorganisms from a fluid stream without any damage to the product. The primary objective of sterile filtration is the patient's safety, avoiding the risk for patients, and developing more feasible products without any harmful effects. Sterile filtration includes filtration equipment and filters. They can also be pre-sterilized and obtainable in secured close packaging for the primary sterilization process. The sterile filtration market will have significant growth during the forecast period owing to the increase in the research and development investment by pharmaceutical & other companies and an increasing number of biotechnology & pharmaceutical companies to drive the sterile filtration market growth. The stringent rules and regulations associated with this market are restricting the sterile filtration market growth. The Sterile Filtration Market growth is expected to reach at the rate of 7.8% CAGR by 2026.

Research Methodology:

The sterile filtration market has been analyzed by utilizing the optimum combination of secondary sources and in-house methodology, along with an irreplaceable blend of primary insights. The real-time assessment of the market is an integral part of our

market sizing and forecasting methodology. Our industry experts and panel of primary participants have helped in compiling relevant aspects with realistic parametric estimations for a comprehensive study. The participation share of different categories of primary participants is given below:

Sterile Filtration by Market Type

- Cartridge Filters
- Angioplasty Balloons
- Capsule Filters
- Membranes
- Syringe Filters
- Others

Sterile Filtration Market by Membrane Type

- Polyvinylidene Difluoride (PVDF)
- Polyethersulfone (PES)
- Nylon
- Polytetrafluoroethylene (PTFE)
- Others

Sterile Filtration by Market Application

- Fill-Finish Process
- Buffer Filtration & Cell Culture Media Preparation

Bioburden Reduction

Water Purification

Air Filtration

Sterile Filtration by Market End-User

Pharmaceutical & Biopharmaceutical Firms

Food & Beverage Firms

Contract Research Organizations

Academic Institutes & Research Laboratories

Sterile Filtration Market by Geography

North America

Europe

Asia Pacific

Rest of the World

The type of the sterile filtration market involves cartridge filters, capsule filters, membranes, syringe filters, bottle-top & table-top filtration systems, and accessories. The cartridge filters segment has a major share in the market, which is ascribed to the rising usage of various numbers of filters for larger procedures that require additional filtration area and less cost.

In the sterile filtration market for membrane type, the polyethersulfone membranes are majorly utilized and holding a maximum share. The high usage of this type of membrane is credited to the provision of faster flow rates over the nylon membranes. Moreover, this type of membrane is regarded as the relevant type for media filtration of

cell culture.

The sterile filtration is primarily applied in the biopharmaceutical over other applications. Since the products of biopharmaceuticals are generally not cleaned terminally, so it is important to use sterile filters. Heat sterilization or any other type of process in biopharmaceutical drug products leads to unwanted damage to the product. Thus, the sterilization membrane is required to decrease the bioburden in the process.

As per the end-users of the sterile filtration market, the food and beverage segment is expected to have the highest growth rate. In the food & beverage, proper sterile filtration is a significant part of the manufacturing process in order to avoid impurities, damage, and product loss. This is because sterile filtration provides complete pollution-free filtration of air and reduces the risk of spoilage of the products.

The North American market of sterile filtration is happening to be the largest shareholder. This is due to the existence of a large quantity of pharmaceutical and biotechnology companies and food and beverage companies in this region. Moreover, the stringent rules for the pharmaceutical sector are supporting the maximum share in North America.

Majorly, the following factors that influence the global sterile filtration market growth are increasing the number of health disorders due to the shift in public lifestyle and deployment of several advanced technologies, and introduction of innovative sterile products considering the preferences of end-users. Apart from that, the huge costs are restricting end-user adoption and hindering the sterile filtration market growth.

The notable companies included in the sterile filtration market report are Danaher Corporation, Sartorius AG, Thermo Fisher Scientific, Boehringer Ingelheim International GmbH, Sterlitech Corporation, GE Healthcare, Merck KGaA, 3M, Parker Hannifin Corporation, Alfa Laval AB, Porvair Filtration Corp, Alomone Labs, Ltd, and Haffkine Bio-Pharmaceutical Corporation Limited.

As a result, sterile filtration is playing a significant role in the pharmaceutical and biotechnology industries as it is an effective process for sterilizing the products. This report further offers significant factors that are contributing to the sterile filtration market growth during the forecast period.

This report also elucidates the constraints, opportunities, advanced product launches of the sterile filtration market.

+44 20 8123 2220
info@marketpublishers.com

Research also presents the geographical and country-level analysis, which involves the demand and supply forces and also their effect on the market.

This report covers the competitive landscape that includes the share of major players and their strategies.

All the included company's profiles cover product offerings, financial information, latest developments, SWOT analysis, and strategies by the players.
