Abstracts

The global dry mix mortar market size was valued at USD 55.0 billion in 2025 and is projected to grow from USD 57.9 billion in 2026 to USD 83.1 billion by 2033, at a CAGR of 5.3% from 2026 to 2033. Asia Pacific dominated the dry mix mortar market with the largest revenue share of 46.7% in 2025. The dry mix mortar market is witnessing increasing demand due to the expansion of residential, commercial, and infrastructure construction activities.

Growing urbanization is increasing the need for faster and more efficient construction methods, particularly in developing economies. Pre-mixed mortar products reduce on-site preparation requirements and provide greater consistency in material quality and application.

The growing construction of residential buildings, commercial facilities, and infrastructure projects is a major driver for dry mix mortar demand. Increasing labor costs and shortages of skilled construction workers are encouraging contractors to adopt products that require less manual preparation. Factory-controlled production enables manufacturers to provide consistent formulations with controlled cement, sand, additives, and performance-enhancing chemicals. Demand is also rising for specialized mortars offering improved adhesion, water resistance, durability, flexibility, and workability.

Government investments in housing, transportation, urban development, and infrastructure are supporting construction activity and indirectly increasing demand for dry mix mortar. Building codes and construction standards increasingly emphasize structural durability, energy efficiency, fire performance, and material quality. Green building initiatives are encouraging manufacturers to develop mortars with lower environmental impact and improved resource efficiency. Governments are also promoting standardized and industrialized construction practices to improve building quality and reduce construction waste. Regulations covering cementitious materials, construction chemicals, worker safety, and building performance are influencing product formulation and manufacturing processes.

Global Dry Mix Mortar Market Report Segmentation

This report forecasts revenue growth at regional & country levels and provides an analysis on the industry trends in each of the sub-segments from 2021 to 2033. For this study, Grand View Research has segmented the global dry mix mortar market on the basis of product type, application, end use, and region:

Product Type Outlook (Revenue, USD Million, 2021 - 2033)

- Cement-based Mortar
- Gypsum-based Mortar
- Polymer-modified Mortar
- Others

Application Outlook (Revenue, USD Million, 2021 - 2033)

- Plaster
- Tile Adhesive
- Render
- Others
