Abstracts

The global gas feed system market size was valued at USD 1,162.4 million in 2025 and is projected to grow from USD 1,233.7 million in 2026 to USD 1,919.3 million by 2033, at a CAGR of 6.5% from 2026 to 2033. Asia Pacific dominated the market, accounting for a revenue share of 34.4% in 2025. The market is driven by the need for precise and consistent gas dosing across water and wastewater treatment, chemicals and process industries, oil and gas, food and beverage, and power and utility applications.

Stringent safety and process-control requirements are encouraging industrial and treatment facilities to adopt dedicated equipment for regulating gas flow and pressure, particularly where controlled dosing is essential to process performance. Additionally, modernization of industrial facilities and expansion of water treatment infrastructure are creating opportunities for automated and integrated gas feed solutions. The increasing use of automatic and semi-automatic operations, along with the integration of monitoring and control functions, is facilitating the replacement of manually operated equipment and supporting demand for more sophisticated gas-feeding configurations.

Global Gas Feed System Market Report Segmentation

This report forecasts revenue growth at global, regional & country levels and provides an analysis on the industry trends in each of the sub-segments from 2021 to 2033. For
