About Manganese Market

Manganese is metal with important industrial metal alloy uses, particularly in stainless steels. Steelmaking, including its ironmaking component, accounts for most manganese demand, presently in the range of 85% to 90% of the total. Products for construction, machinery, and transportation are leading end uses of manganese. Manganese also is a key component of certain widely used aluminum alloys and, in oxide form, dry cell batteries.

World leader in manganese mining and production is China which turns out about 35% of crude ore and over 60% of ferro- and silicomanganese.
