Abstracts

The global neonatal mechanical ventilators market size was valued at USD 542.1 million in 2025 and is projected to grow from USD 564.3 million in 2026 to USD 923.4 million by 2033, at a CAGR of 7.3% from 2026 to 2033. North America dominated the market, accounting for the largest revenue share of 39.5% in 2025. This growth is attributed to the rising prevalence of preterm births and neonatal respiratory distress, the increasing adoption of lung-protective neonatal ventilation, the growing need for neonatal transport and critical-care ventilation, and the expansion of advanced neonatal respiratory support in NICUs.
