According to our (Global Info Research) latest study, the global Managed Pressure Drilling market size was valued at USD 249.7 million in 2023 and is forecast to a readjusted size of USD 306.4 million by 2030 with a CAGR of 3.0% during review period.

A Magnetic Drill Press is a specialized portable power tool used for drilling holes in steel and similar metals.

• They are used on the job site or in the shop

• Also referred to as a mag drill, portable base drills, portable drill press

It can be time-consuming and cumbersome to try to maneuver large steel or pipe into position at a stationary drill press or work center. A portable magnetic drill allows you to take the drill to the work piece, instead of trying to bring the work piece to the drill.

A portable magnetic drill may be used in any position—vertical, horizontal, or overhead (upside down)

Globally, the Magnetic Drill Press industry market is low concentrated as the manufacturing technology of Magnetic Drill Press is relatively matures than some high-tech equipment. And some enterprises, like Milwaukee, Hougen, Metabo and C.?E. Fein GmbH, etc. are well-known for the wonderful performance of their Magnetic Drill Press and related services. At the same time, Europe, occupied 33% production market share, is remarkable in the global Magnetic Drill Press industry because of their market
