According to our (Global Info Research) latest study, the global Medical Billing market size was valued at USD 7388.9 million in 2023 and is forecast to a readjusted size of USD 11710 million by 2030 with a CAGR of 6.8% during review period.

Medical billing is a payment practice within health system. The process involves a healthcare provider submitting, and following up on, claims with health insurance companies in order to receive payment for Services rendered; such as treatments and investigations. The same process is used for most insurance companies, whether they are private companies or government sponsored programs. Medical coding reports what the diagnosis and treatment were, and prices are applied accordingly.

According to our research, the global market for medical devices is estimated at US$ 603 billion in the year 2023, and will be growing at a CAGR of 5% during next six years. The global healthcare spending contributes to occupy 10% of the global GDP and is continuously rising in recent years due to the increasing health needs of the aging population, the growing prevalence of chronic and infectious diseases and the expansion of emerging markets. The medical devices market plays a significant role in the healthcare industry. The market is driven by several factors, including the increasing demand for advanced healthcare services globally, advancements in medical technology, growing geriatric population, rising healthcare expenditure, and increasing awareness about early disease diagnosis and treatment.

The Global Info Research report includes an overview of the development of the Medical Billing industry chain, the market status of Hospital (Professional Billing, Institutional Billing), Clinics (Professional Billing, Institutional Billing), and key enterprises in developed and developing market, and analysed the cutting-edge
