Abstracts

Mobile gambling refers to playing games of chance or skill for money by using a remote device such as a tablet computer, smartphone or a mobile phone with a wireless internet connection.

According to our (Global Info Research) latest study, the global Mobile Gambling market size was valued at USD 98020 million in 2022 and is forecast to a readjusted size of USD 259310 million by 2029 with a CAGR of 14.9% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

One of the main drivers of this market is the increased interest of young people. Mobile gambling attracts young people, something that traditional physical casinos have failed to do. Mobile gambling extends the range of gambling to people who do not visit casinos or gambling bars.
