According to our (Global Info Research) latest study, the global On-Premise-Laundry (OPL) market size was valued at USD 5385.5 million in 2023 and is forecast to a readjusted size of USD 6354.8 million by 2030 with a CAGR of 2.4% during review period.

On-Premise-Laundry (OPL) refers to a laundry facility that is installed within a facility or property, such as a hotel, hospital, or commercial establishment, for the purpose of providing laundry services in-house. Instead of outsourcing laundry services to a third-party laundry service provider, OPL allows the facility to handle laundry operations internally.

OPL typically consists of industrial-grade washing machines, dryers, and other laundry equipment suitable for handling large volumes of laundry. It may also include amenities like pressing machines, folding tables, and storage areas for clean and dirty linens.With an OPL system, the facility has direct control over laundry processes, ensuring that linens and garments meet quality standards and are properly cleaned and maintained.An OPL system allows for quicker turnaround times as laundry can be processed on-site, minimizing delays and ensuring availability of clean linens and garments.OPL systems can be tailored to the specific laundry needs of the facility, such as accommodating different fabrics or specialized cleaning requirements.On-Premise-Laundry (OPL) is an in-house laundry system that allows facilities to handle laundry operations internally. It offers cost savings, control over quality, efficiency, convenience, and customization. However, it also requires significant investment, ongoing costs, space, staff training, and compliance with regulations.
