A length of the badminton racket is not more than 68 cm, which the length of racket handle and rod is not more than 42 cm. With the development of science and technology, the development of the racket is becoming light, the racket frame is becoming hard, the racket rod is becoming flexible, and the air resistance is becoming small.The number of badminton enthusiasts in Europe and the Americas is far less than in Asia and Southeast Asia. It is mainly popular in the Nordic region, such as Sweden. The region is affected by the region, the temperature is low, and even the night is even in the winter, so indoor sports such as badminton are quite popular. Popular, but due to the small population base, the market potential is small, and badminton in other parts of Europe and the United States belongs to the niche movement. Although the development trend is good, the market will not grow much in a short time.
