Global Pipe Cold Cutting and Beveling Machine Market 2026 by Manufacturers, Regions, Type and Application, Forecast to 2032

https://marketpublishers.com/r/G82B00C52C5AEN.html
Date: September 2026
Pages: 131
Price: US$ 3,480.00 (Single User License)
ID: G82B00C52C5AEN

Abstracts

According to our (Global Info Research) latest study, the global Pipe Cold Cutting and Beveling Machine market size was valued at US$ 173 million in 2025 and is forecast to a readjusted size of US$ 247 million by 2032 with a CAGR of 5.2% during review period.

The Pipe Cold Cutting and Beveling Machine market covers specialized industrial equipment that mechanically severs pipes and prepares weld ends through turning, milling, or orbital cutting processes without applying a thermal cutting source. The research scope primarily encompasses split-frame or clamshell machines mounted around in-line pipes, chain-mounted traveling systems, orbital cutting systems with beveling capability, and stationary integrated equipment capable of completing both cut-off and bevel preparation. A typical system consists of a clamping frame, rotating machining ring or traveling track, cutting and beveling tool slides, automatic or controlled feed mechanisms, drive modules, and alignment components. Pneumatic, electric, hydraulic, and servo-controlled drives are selected according to pipe diameter, wall thickness, material, installation space, hazardous-area requirements, and required machining accuracy. Core functions may include straight severing, simultaneous cutting and beveling, compound or J-bevel preparation, facing, counterboring, and weld removal. The equipment is primarily used in oil and gas pipelines, refineries, chemical plants, power and nuclear facilities, offshore infrastructure, shipbuilding, LNG projects, pipe-spool fabrication, and industrial maintenance, where accurate weld preparation, limited heat effects, and reliable operation in confined or hazardous environments are required.

Key Findings

+357 96 030922
info@marketpublishers.com

In 2025, global Pipe Cold Cutting and Beveling Machine production reached approximately 6,471 Units.The average price is approximately $26,000.

Split-frame clamshell configurations remained the dominant architecture for in-situ maintenance, shutdown, and pipeline modification work

The top five supplier groups accounted for about 54% of revenue, while regional manufacturers formed a fragmented long tail

Market Trends

The Pipe Cold Cutting and Beveling Machine market is evolving through incremental but commercially important improvements rather than a fundamental change in machining principles. Product development increasingly emphasizes lower radial and axial clearance, lighter split frames, faster centering, modular tool slides, automatic feed, improved rigidity, and wider compatibility with carbon steel, stainless steel, duplex steel, nickel alloys, and thick-wall pipe. Customers are also seeking systems that combine severing, beveling, facing, and counterboring within one platform, reducing equipment changes during short maintenance windows. Pneumatic and hydraulic systems remain important for hazardous and heavy-duty work, while electric and servo-controlled configurations are gaining relevance in fabrication shops, nuclear projects, and applications requiring repeatable machining parameters. Remote operation, digital process settings, automatic speed control, and machining-data recording are expected to penetrate high-value projects first. At the same time, manufacturers are extending modular product families across a wider diameter range, enabling customers to use common drives, tooling concepts, and operating procedures across multiple frame sizes.

Market Dynamics

Drivers

Demand is supported by the maintenance and modification requirements of aging pipelines, refineries, chemical plants, power stations, offshore platforms, and marine assets. Scheduled shutdowns create a need for equipment that can be installed quickly and deliver weld-ready pipe ends within limited operating windows. Mechanical cold cutting is particularly valuable where thermal processes are restricted because of combustible materials, hazardous atmospheres, metallurgical concerns, or nearby

+357 96 030922
info@marketpublishers.com

operating equipment. Increasing use of stainless steel, duplex steel, chromium-molybdenum steel, and nickel-based alloys also raises the importance of controlled cutting and consistent bevel geometry. Nuclear maintenance and decommissioning, LNG infrastructure, offshore development, and the expansion of automated welding further support demand for accurate, low-clearance, and application-specific systems.

Restraints

Market expansion is moderated by the long operating life of professional equipment and the established availability of rental, refurbished, and remanufactured machines. Large-diameter and hydraulic systems involve considerable initial investment, while purchasing decisions may be delayed when contractors can rent equipment for a specific turnaround or pipeline project. Demand is also project-driven and can fluctuate with maintenance schedules, energy-sector capital expenditure, and the timing of industrial construction. In workshop environments, conventional saws, automated pipe-fabrication lines, and certain numerical-control cutting systems may provide a lower-cost alternative when hazardous-area operation and in-situ installation are not required. The need for size-specific frames, tooling, and operator training can further increase the total cost of ownership.

Opportunities

The most attractive opportunities are emerging in nuclear life-extension and decommissioning programs, offshore and subsea maintenance, LNG terminals, hydrogen transportation infrastructure, carbon capture and storage pipelines, and high-alloy process piping. These applications require accurate machining, controlled weld preparation, and equipment that can operate in restricted spaces or difficult environmental conditions. Additional potential exists in high-purity stainless-steel piping for semiconductor, pharmaceutical, and advanced manufacturing facilities, where orbital cutting, repeatability, and contamination control are important. Manufacturers can also expand through modular frame systems, automated feeding, remote control, equipment monitoring, and integrated cutting-and-welding preparation workflows. Chinese and Indian suppliers have opportunities to move beyond standardized small and medium models into larger-diameter, hydraulic, and application-certified equipment.

Challenges

Manufacturers must maintain machining accuracy under variations in pipe ovality, wall thickness, corrosion, surface condition, and installation alignment. Achieving sufficient structural rigidity while reducing machine weight and clearance remains an important

+357 96 030922
info@marketpublishers.com

engineering challenge, especially for large-diameter and thick-wall applications. Suppliers also face long customer qualification cycles in nuclear, offshore, high-purity, and other safety-critical industries. Global competition requires extensive distributor, spare-parts, training, and service coverage, which can be difficult for smaller manufacturers to establish. Price competition from regional suppliers, product imitation, foreign-exchange movements, tariffs, and variable component lead times may pressure profitability. The industry must also address operator shortages by simplifying setup, reducing dependence on manual adjustment, and improving process repeatability.

Industry Chain Analysis

The upstream supply chain includes high-strength alloy steel and aluminum used for machine rings and housings, precision bearings, gears, drive pinions, fastening and clamping components, pneumatic motors, electric motors, hydraulic motors and power units, servo systems, control components, and high-performance cutting tools. Machine rigidity, bearing accuracy, gear engagement, tool-slide stability, and drive reliability directly influence surface finish, cut perpendicularity, bevel consistency, and equipment life. Precision-machined split rings, tool holders, bearings, gear systems, and drive modules represent major hardware cost elements, while engineering design, testing, certification, and application customization contribute a significant portion of value in high-end systems.

Midstream participants undertake mechanical design, machining, heat treatment, assembly, calibration, tooling development, and performance testing. Value creation is concentrated in diameter coverage, low-clearance design, fast and accurate alignment, resistance to cutting loads, adaptability to different pipe materials, and reliable operation in demanding environments. Downstream channels include direct sales, authorized distributors, rental organizations, field-machining contractors, engineering and construction companies, maintenance contractors, pipe-fabrication facilities, and industrial asset owners. Premium suppliers generally achieve stronger pricing through established brands, broad product ranges, project engineering, global service coverage, and certified applications, while regional manufacturers compete primarily through price, delivery speed, and customized configurations.

Segment Insights

Split-frame or clamshell equipment forms the largest product segment because it can be opened and mounted around an existing pipeline without access from the pipe end. This structure is widely used in refinery turnarounds, power-plant maintenance, pipeline tie-ins, valve replacement, and offshore repair. Chain-mounted traveling machines address

+357 96 030922
info@marketpublishers.com

very-large-diameter pipes and applications where conventional ring sizes become impractical, while orbital systems are more prominent in small- and medium-diameter stainless-steel, high-purity, and prefabrication work. Stationary integrated systems occupy a smaller but distinct position in repetitive workshop production.

By drive type, pneumatic systems remain important in hazardous areas, while hydraulic equipment is favored for large diameters, heavy wall thicknesses, and high cutting loads. Electric machines are widely adopted for general construction and shop use because they require less supporting equipment. Servo-controlled systems remain a premium segment but offer attractive potential where customers require repeatable feed, controlled cutting speed, automated operation, and documented machining parameters. Product value and average selling prices generally increase with diameter range, wall-thickness capability, automation, hazardous-area suitability, and the degree of application customization.

Downstream Market Opportunities

Oil, gas, and petrochemical activities remain the largest downstream demand base, particularly for refinery shutdowns, pipeline maintenance, LNG facilities, and offshore assets. Power generation and nuclear applications represent a smaller but higher-value segment because projects typically require stronger quality assurance, precision, documentation, and specialized operating configurations. Shipbuilding, offshore engineering, chemical processing, and industrial pipe fabrication provide recurring demand tied to maintenance cycles and capital projects. Emerging opportunities are developing in nuclear decommissioning, hydrogen and carbon-dioxide pipelines, high-purity semiconductor facilities, and automated pipe-spool fabrication. In these applications, customers are increasingly evaluating not only purchase price but also setup time, machining repeatability, tool life, technical support, and the ability to integrate the equipment into a controlled welding workflow.

Regional Insights

North America accounted for approximately 56% of 2025 market revenue and remained the largest regional market, supported by a concentration of established equipment groups, a large installed base of refineries and pipelines, nuclear and power-generation maintenance, and extensive use of rental and field-machining services. The region has a comparatively high-value product mix because large-diameter, low-clearance, hydraulic, nuclear, and customized systems represent a significant share of expenditure. Europe accounted for approximately 19%, with Germany, France, Italy, and the United Kingdom supporting strong capabilities in heavy-wall cutting, orbital

+357 96 030922
info@marketpublishers.com

systems, offshore applications, and specialized machining.

China represented approximately 14% of revenue but had one of the largest populations of regional manufacturers, principally serving standardized split-frame equipment and export markets. India accounted for approximately 5% and has developed a smaller domestic manufacturing base linked to oil and gas construction, petrochemical investment, and engineering contractors. China and India offer substantial volume-expansion potential, while South Korea has a differentiated position in precision orbital systems and high-purity piping. Japan, Southeast Asia, and the Middle East remain important user markets but continue to depend heavily on imported equipment, distributors, rental organizations, and field-service providers.

Competitive Landscape Analysis

The Pipe Cold Cutting and Beveling Machine market has a moderately concentrated revenue structure combined with a fragmented regional supplier base. The five largest supplier groups represented approximately 54% of 2025 revenue, while the top ten accounted for about 71%. S.F.E. Group, Illinois Tool Works, Enerpac Tool Group, Tri Tool, and Mactech occupy strong positions through broad size coverage, established installed bases, application expertise, rental or service networks, and access to nuclear, offshore, and other demanding projects. Specialized European manufacturers compete through heavy-wall performance, chain-mounted technology, orbital machining, and very-large-diameter capabilities, while Chinese and Indian suppliers emphasize standardized equipment, shorter delivery times, and lower acquisition costs. Industry consolidation is becoming more important: Enerpac Tool Group announced an agreement in July 2026 to acquire S.F.E. Group, whose portfolio includes twelve fabrication, welding, and portable-machining brands. The transaction remained subject to regulatory approval and was expected to close in the first quarter of Enerpac’s fiscal 2027, so the two groups continue to be treated separately in the current competitive analysis. If completed, the combination could strengthen channel coverage, cross-selling, service support, and product-platform integration across the global market.

Report Scope

This report is a detailed and comprehensive analysis for global Pipe Cold Cutting and Beveling Machine market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets.

+357 96 030922
info@marketpublishers.com

Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Pipe Cold Cutting and Beveling Machine market size and forecasts, in consumption value ($ Million), sales quantity (Units), and average selling prices (US$/Unit), 2021-2032

Global Pipe Cold Cutting and Beveling Machine market size and forecasts by region and country, in consumption value ($ Million), sales quantity (Units), and average selling prices (US$/Unit), 2021-2032

Global Pipe Cold Cutting and Beveling Machine market size and forecasts, by Type and by Application, in consumption value ($ Million), sales quantity (Units), and average selling prices (US$/Unit), 2021-2032

Global Pipe Cold Cutting and Beveling Machine market shares of main players, shipments in revenue ($ Million), sales quantity (Units), and ASP (US$/Unit), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Pipe Cold Cutting and Beveling Machine

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Pipe Cold Cutting and Beveling Machine market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include S.F.E. Group LLC, Illinois Tool Works Inc., Enerpac Tool Group Corp., Tri Tool Inc., Mactech, Inc., PROTEM SAS, G.B.C. Industrial Tools S.p.A., DWT GmbH, C.&E. Fein GmbH, POWERMASTER LTD, etc.

+357 96 030922
info@marketpublishers.com

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Pipe Cold Cutting and Beveling Machine market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by region, regional analysis covers

North America (United States, Canada, and Mexico)

Europe (Germany, France, United Kingdom, Russia, Italy, and Rest of Europe)

Asia-Pacific (China, Japan, Korea, India, Southeast Asia, and Australia)

South America (Brazil, Argentina, Colombia, and Rest of South America)

Middle East & Africa (Saudi Arabia, UAE, Egypt, South Africa, and Rest of Middle East & Africa)

Chapter Outline

Chapter 1, to describe Pipe Cold Cutting and Beveling Machine product scope, market overview, market estimation caveats and base year.

+357 96 030922
info@marketpublishers.com

Chapter 2, to profile the top manufacturers of Pipe Cold Cutting and Beveling Machine, with price, sales quantity, revenue, and global market share of Pipe Cold Cutting and Beveling Machine from 2021 to 2026.

Chapter 3, the Pipe Cold Cutting and Beveling Machine competitive situation, sales quantity, revenue, and global market share of top manufacturers are analyzed emphatically by landscape contrast.

Chapter 4, the Pipe Cold Cutting and Beveling Machine breakdown data are shown at the regional level, to show the sales quantity, consumption value, and growth by regions, from 2021 to 2032.

Chapter 5 and 6, to segment the sales by Type and by Application, with sales market share and growth rate by Type, by Application, from 2021 to 2032.

Chapter 7, 8, 9, 10 and 11, to break the sales data at the country level, with sales quantity, consumption value, and market share for key countries in the world, from 2021 to 2026.and Pipe Cold Cutting and Beveling Machine market forecast, by regions, by Type, and by Application, with sales and revenue, from 2027 to 2032.

Chapter 12, market dynamics, drivers, restraints, trends, and Porters Five Forces analysis.

Chapter 13, the key raw materials and key suppliers, and industry chain of Pipe Cold Cutting and Beveling Machine.

Chapter 14 and 15, to describe Pipe Cold Cutting and Beveling Machine sales channel, distributors, customers, research findings and conclusion.

1 MARKET OVERVIEW

1.1 Product Overview and Scope
1.2 Market Estimation Caveats and Base Year
1.3 Market Analysis by Type
  1.3.1 Overview: Global Pipe Cold Cutting and Beveling Machine Consumption Value by Type: 2021 Versus 2025 Versus 2032
  1.3.2 Clamshell Machines
  1.3.3 Chain-Mounted Traveling Machines
  1.3.4 Orbital Saw and Bevel Systems
  1.3.5 Others
1.4 Market Analysis by Drive Type
  1.4.1 Overview: Global Pipe Cold Cutting and Beveling Machine Consumption Value by Drive Type: 2021 Versus 2025 Versus 2032
  1.4.2 Pneumatic Drive
  1.4.3 Electric Drive
  1.4.4 Hydraulic Drive
  1.4.5 Others
1.5 Market Analysis by Pipe Diameter Range
  1.5.1 Overview: Global Pipe Cold Cutting and Beveling Machine Consumption Value by Pipe Diameter Range: 2021 Versus 2025 Versus 2032
  1.5.2 Small Diameter?up to 6 in
  1.5.3 Medium Diameter?over 6 to 24 in
  1.5.4 Large Diameter?over 24 to 60 in
  1.5.5 Extra-Large Diameter?over 60 in
1.6 Market Analysis by Application
  1.6.1 Overview: Global Pipe Cold Cutting and Beveling Machine Consumption Value by Application: 2021 Versus 2025 Versus 2032
  1.6.2 In-Situ Maintenance and Repair
  1.6.3 Shutdown and Turnaround
  1.6.4 New Pipeline Construction
  1.6.5 Others
1.7 Global Pipe Cold Cutting and Beveling Machine Market Size & Forecast
  1.7.1 Global Pipe Cold Cutting and Beveling Machine Consumption Value (2021 & 2025 & 2032)
  1.7.2 Global Pipe Cold Cutting and Beveling Machine Sales Quantity (2021-2032)
  1.7.3 Global Pipe Cold Cutting and Beveling Machine Average Price (2021-2032)

(2021-2032)
5.3 Global Pipe Cold Cutting and Beveling Machine Average Price by Type (2021-2032)

6 MARKET SEGMENT BY APPLICATION

6.1 Global Pipe Cold Cutting and Beveling Machine Sales Quantity by Application (2021-2032)
6.2 Global Pipe Cold Cutting and Beveling Machine Consumption Value by Application (2021-2032)
6.3 Global Pipe Cold Cutting and Beveling Machine Average Price by Application (2021-2032)

7 NORTH AMERICA

7.1 North America Pipe Cold Cutting and Beveling Machine Sales Quantity by Type (2021-2032)
7.2 North America Pipe Cold Cutting and Beveling Machine Sales Quantity by Application (2021-2032)
7.3 North America Pipe Cold Cutting and Beveling Machine Market Size by Country
  7.3.1 North America Pipe Cold Cutting and Beveling Machine Sales Quantity by Country (2021-2032)
  7.3.2 North America Pipe Cold Cutting and Beveling Machine Consumption Value by Country (2021-2032)
  7.3.3 United States Market Size and Forecast (2021-2032)
  7.3.4 Canada Market Size and Forecast (2021-2032)
  7.3.5 Mexico Market Size and Forecast (2021-2032)

8 EUROPE

8.1 Europe Pipe Cold Cutting and Beveling Machine Sales Quantity by Type (2021-2032)
8.2 Europe Pipe Cold Cutting and Beveling Machine Sales Quantity by Application (2021-2032)
8.3 Europe Pipe Cold Cutting and Beveling Machine Market Size by Country
  8.3.1 Europe Pipe Cold Cutting and Beveling Machine Sales Quantity by Country (2021-2032)
  8.3.2 Europe Pipe Cold Cutting and Beveling Machine Consumption Value by Country (2021-2032)
  8.3.3 Germany Market Size and Forecast (2021-2032)

+357 96 030922
info@marketpublishers.com

8.3.4 France Market Size and Forecast (2021-2032)
8.3.5 United Kingdom Market Size and Forecast (2021-2032)
8.3.6 Russia Market Size and Forecast (2021-2032)
8.3.7 Italy Market Size and Forecast (2021-2032)

9 ASIA-PACIFIC

9.1 Asia-Pacific Pipe Cold Cutting and Beveling Machine Sales Quantity by Type (2021-2032)
9.2 Asia-Pacific Pipe Cold Cutting and Beveling Machine Sales Quantity by Application (2021-2032)
9.3 Asia-Pacific Pipe Cold Cutting and Beveling Machine Market Size by Region
9.3.1 Asia-Pacific Pipe Cold Cutting and Beveling Machine Sales Quantity by Region (2021-2032)
9.3.2 Asia-Pacific Pipe Cold Cutting and Beveling Machine Consumption Value by Region (2021-2032)
9.3.3 China Market Size and Forecast (2021-2032)
9.3.4 Japan Market Size and Forecast (2021-2032)
9.3.5 South Korea Market Size and Forecast (2021-2032)
9.3.6 India Market Size and Forecast (2021-2032)
9.3.7 Southeast Asia Market Size and Forecast (2021-2032)
9.3.8 Australia Market Size and Forecast (2021-2032)

10 SOUTH AMERICA

10.1 South America Pipe Cold Cutting and Beveling Machine Sales Quantity by Type (2021-2032)
10.2 South America Pipe Cold Cutting and Beveling Machine Sales Quantity by Application (2021-2032)
10.3 South America Pipe Cold Cutting and Beveling Machine Market Size by Country
10.3.1 South America Pipe Cold Cutting and Beveling Machine Sales Quantity by Country (2021-2032)
10.3.2 South America Pipe Cold Cutting and Beveling Machine Consumption Value by Country (2021-2032)
10.3.3 Brazil Market Size and Forecast (2021-2032)
10.3.4 Argentina Market Size and Forecast (2021-2032)

11 MIDDLE EAST & AFRICA

+357 96 030922
info@marketpublishers.com

11.1 Middle East & Africa Pipe Cold Cutting and Beveling Machine Sales Quantity by Type (2021-2032)
11.2 Middle East & Africa Pipe Cold Cutting and Beveling Machine Sales Quantity by Application (2021-2032)
11.3 Middle East & Africa Pipe Cold Cutting and Beveling Machine Market Size by Country
  11.3.1 Middle East & Africa Pipe Cold Cutting and Beveling Machine Sales Quantity by Country (2021-2032)
  11.3.2 Middle East & Africa Pipe Cold Cutting and Beveling Machine Consumption Value by Country (2021-2032)
  11.3.3 Turkey Market Size and Forecast (2021-2032)
  11.3.4 Egypt Market Size and Forecast (2021-2032)
  11.3.5 Saudi Arabia Market Size and Forecast (2021-2032)
  11.3.6 South Africa Market Size and Forecast (2021-2032)

12 MARKET DYNAMICS

12.1 Pipe Cold Cutting and Beveling Machine Market Drivers
12.2 Pipe Cold Cutting and Beveling Machine Market Restraints
12.3 Pipe Cold Cutting and Beveling Machine Trends Analysis
12.4 Porters Five Forces Analysis
  12.4.1 Threat of New Entrants
  12.4.2 Bargaining Power of Suppliers
  12.4.3 Bargaining Power of Buyers
  12.4.4 Threat of Substitutes
  12.4.5 Competitive Rivalry

13 RAW MATERIAL AND INDUSTRY CHAIN

13.1 Raw Material of Pipe Cold Cutting and Beveling Machine and Key Manufacturers
13.2 Manufacturing Costs Percentage of Pipe Cold Cutting and Beveling Machine
13.3 Pipe Cold Cutting and Beveling Machine Production Process
13.4 Industry Value Chain Analysis

14 SHIPMENTS BY DISTRIBUTION CHANNEL

14.1 Sales Channel
  14.1.1 Direct to End-User
  14.1.2 Distributors

+357 96 030922
info@marketpublishers.com

14.2 Pipe Cold Cutting and Beveling Machine Typical Distributors
14.3 Pipe Cold Cutting and Beveling Machine Typical Customers

15 RESEARCH FINDINGS AND CONCLUSION

16 APPENDIX

16.1 Methodology
16.2 Research Process and Data Source
16.3 Disclaimer

I would like to order

Product name: Global Pipe Cold Cutting and Beveling Machine Market 2026 by Manufacturers, Regions, Type and Application, Forecast to 2032

Product link: https://marketpublishers.com/r/G82B00C52C5AEN.html

Price: US$ 3,480.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page https://marketpublishers.com/r/G82B00C52C5AEN.html
