A Steel Cylinder Self-Contained Breathing Apparatus (SCBA) is a crucial piece of personal protective equipment used primarily in hazardous environments where breathable air is not available. It consists of a high-pressure steel cylinder filled with compressed air or other breathable gases, a pressure regulator, a facepiece with a built-in respiratory protection system, and a harness for securing the cylinder to the user. The SCBA allows individuals, such as firefighters and emergency responders, to work safely in environments contaminated by smoke, chemicals, or low oxygen levels. The steel cylinder provides durability and resistance to damage, ensuring a reliable supply of air for the wearer while they perform critical tasks in dangerous conditions.
