According to our (Global Info Research) latest study, the global Test-Environment-as-a-Service market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Testing as a service (TEaaS) is an on-demand cloud-based service to manage end-to-end software test environments. Test environments are created during the software testing process to enable software testers to use testing tools and executive testing processes successfully and to develop high-quality software products and applications. Firms are using cloud-based solutions for test environment management over on-premise software solutions. Cloud-based TEM solutions are cost-effective, flexible, and scalable software testing solutions. IT provides flexibility in terms of usage of TEaaS, for software testers to perform software testing on newly built software products and applications.

One of the latest trends in this market is the implementation of on-demand testing services in the software testing process to manage end-to-end software testing life cycle (STLC) with low-cost IT solutions. On-demand test labs are cost-effective solutions where the software testers pay for test labs on the basis of usage of test environment lab services. On-demand test labs are ideal for software testing teams to perform the software testing collaboratively in a multi-platform environment to develop high-quality software. For instance, the Google Cloud Test Lab offers a test environment for application developers to manage end-to-end application development processes.
