The global Bathtub Tray market size is predicted to grow from US$ 492 million in 2025 to US$ 742 million in 2031; it is expected to grow at a CAGR of 7.1% from 2025 to 2031.

Bathtub trays are usually divided into different types according to different industry needs, functionality, design, materials, and other factors. For accurate statistics and analysis, bathtub trays are mainly used for toiletries (such as soap, shower gel, shampoo, towels, etc.), as well as personal items (such as mobile phones, books, drinks, etc.). When counting, the basic functions of the product should be clarified, such as whether there is a function of placing items and supporting items. Some bathtub trays are designed to be multi-functional products that can be resized, support a tablet or phone, place bath salts, scented candles, and more. These trays may have additional functions, such as wine glasses, dinner plates, etc., to suit specific user needs. The following are the main aspects of the bathtub tray in terms of use, which are divided into daily household use, commercial use and special purposes, and daily household use is suitable for home users, emphasizing the convenience, comfort and aesthetics of daily use. The use of commercial places is suitable for hotels, hot springs, SPAs and other commercial places, emphasizing durability, cleaning convenience and high-end design. Special use: such as medical, nursing, elderly use, etc., there will be different product designs in different application scenarios, and product design will usually pay more attention to safety and functionality. When defining the statistical scope of bathtub trays, it is necessary to comprehensively consider the function, material, design, size, market application and other aspects of the product.
