The global Ceiling Halogen Surgical Light market size is predicted to grow from US$ million in 2025 to US$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

the essence of surgical lamp is to meet the special requirements of surgery. 1? Operating room lighting brightness requirements, II. Safe operation lighting, III. No shadow requirements, IV. Cold light requirements, V. Removable disinfection requirements. The operating lamp includes two series of integral reflection operating lamp and hole-type operating lamp. The integral reflection operating lamp is also a molecular mother lamp and a single lamp; The hole-type surgical lamp is also divided into two specifications: letter lamp and single lamp. The operating lamp can provide guarantee for the illumination brightness of the operating room. The surgeon in the operating room must be able to accurately distinguish the contour, color and movement. Therefore, the light intensity close to the daylight quality, at least 100000 illuminance, is required. The operating lamp can provide the brightness of a single lamp up to 150000 illuminance, and the brightness of the operating lamp can be adjusted steplessly. In case of failure during the operation, the standby bulb can be automatically switched, The time is 0.3 seconds, so the surgical lamp can provide safe surgical lighting. The operation lamp can meet the requirements of shadow-free lighting through the multilateral reflector. The reflective surface is formed by industrial stamping at one time, with a high reflectivity of 95%, forming a homogeneous light column, and a light column from 80 cm below the lamp panel is formed deep into the operation area to ensure the brightness of the operation, without shadow, and can still be kept very uniform when the surgeon"s shoulder, hand and head block part of the light source.

While the operation lamp is bright, it can avoid generating heat. The shadowless lamp

can filter 99.5% of the infrared component through a new filter to ensure that the light reaching the operation area is cold.

The shape design, installation position and high standard sealing handle of the operating lamp can effectively control the number of pathogens and can be disassembled for disinfection.
