The global Automation Industrial Monitors market was valued at 239.43 Million USD in 2021 and will grow with a CAGR of 1.52% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market verdors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Industrial monitors are widely used in a variety of industrial applications such as smart factories, mining operations, marine ports, food and beverage, oil rigs, and energy management. The ruggedness of industrial display differentiates these monitors from residential and commercial monitors. Industrial monitors are usually made of rugged materials to withstand the impact of harsh environments in both indoor and outdoor applications.According to the report, the rising complexity of industrial process has led to the evolution of SCADA and Distributed Control System (DCS)-based systems for factory automation in the past few years. SCADA and DC-based systems are widely employed in a variety of industries such as oil and gas, mining, power, and automotive to remotely control the physical processes and therefore, require display monitors to survey and control the process parameters continuously. Hence, the industrial monitors market is expected to increase along with the deployment of SCADA during the forecast period.
