About

Product Name: Ammonium Thiosulfite

Synonyms:

Ammonium Thiosulfate

Ammonium Thiosulphate

Ammonium hyposulfite

Ammonium thiosulfate

CAS#: 7783-18-8

Ammonium thiosulfate is a white or colourless crystalline powder/solid with an ammonia odor. Its chemical formula is $H_8N_2O_3S_2$. The substance is easily soluble in either hot or cold water, and poorly soluble in acetone. Ammonium thiosulfate is very vulnerable to heat and inconsistent with aluminum and magnesium powder. While reacting with strong oxidizers, for example, nitrates, chlorates and nitrites, the product releases toxic ammonia, sulfur trioxide gases and hydrogen sulfide.

Ammonium thiosulphate is required as a component of photographic fixer; it works faster than sodium thiosulfate fixers. It is also used in the manufacture of sulphur and nitrogen fertilizers as well as acts as an efficiency enhancer for other kinds of fertilizers. Ammonium thiosulphate also is employed as a shielding effect agent, major constituent of silvering electro bath, analytical and bactericidal reagent. It can also be utilized as an additive reducing very dangerous furans and dioxins in coal-waste mixtures.

Acros Organics B.V.B.A., 9W Pharmaceutical Technology Co., Lovely Chemicals, Martin Resources, Santa Cruz Biotechnology, Spectrum Chemical Mfg. Corp., 3Way Pharm Inc., Hangzhou Dayangchem Co. and TIB Chemicals AG are among the entrenched participants of the ammonium thiosulphate market.

The ammonium thiosulfate market is covered in the Ammonium Thiosulfate (CAS 7783-18-8) Market Research Report 2013. The report encompasses proper description of the product, unveils application areas, and briefly summarizes patents in the sphere. It overlooks the ammonium thiosulfate market situation, names manufacturers, suppliers

as well as users. The report also provides current ammonium thiosulfate prices.
