

Caffeine anhydrous (CAS 58-08-2) Market Research Report 2026

<https://marketpublishers.com/r/C7B4AD1498FEN.html>

Date: June 2026

Pages: 50

Price: US\$ 2,200.00 (Single User License)

ID: C7B4AD1498FEN

Abstracts

Caffeine anhydrous (CAS 58-08-2) Market Research Report 2026 presents comprehensive data on Caffeine anhydrous markets globally and regionally (Europe, Asia, North America etc.)

The report includes Caffeine anhydrous description, covers its application areas and related patterns. It overviews Caffeine anhydrous market, names Caffeine anhydrous producers and indicates its suppliers.

Besides, the report provides Caffeine anhydrous prices in regional markets.

In addition to the above the report determines Caffeine anhydrous consumers in the market.

BAC Reports offers its clients in-depth market research of chemical industry products on the global and regional markets (North & Latin America, Asia Pacific, European Union, Russia and CIS).

We can analyze the following elements for each chemical product in any country or region:

capacities and production

consumption volume and structure

market price trends

exports and imports

existing technologies

feedstock market condition

market news digest

market forecast.

Caffeine anhydrous (CAS 58-08-2) Market Research Report 2026 can feature:

market condition and estimations, market forecast

chemical product ranges, trademarks, analogous products, application areas

regional and global producers, consumers and traders (including contact details).

Contents

1. CAFFEINE ANHYDROUS (CAS 58-08-2)

- 1.1. General information, synonyms
- 1.2. Composition, chemical structure
- 1.3. Safety information
- 1.4. Hazards identification
- 1.5. Handling and storage
- 1.6. Toxicological & ecological information
- 1.7. Transport information

2. CAFFEINE ANHYDROUS APPLICATIONS

- 2.1. Caffeine anhydrous application spheres, downstream products

3. CAFFEINE ANHYDROUS MANUFACTURING METHODS

4. CAFFEINE ANHYDROUS PATENTS

- Abstract
- Description
- Summary of the invention
- Detailed description of the invention

5. CAFFEINE ANHYDROUS MARKET WORLDWIDE

- 5.1. General Caffeine anhydrous market situation, trends
- 5.2. Manufacturers of Caffeine anhydrous
 - Europe
 - Asia
 - North America
 - Other regions
- 5.3. Caffeine anhydrous suppliers (importers, local distributors)
 - Europe
 - Asia
 - North America
 - Other regions

5.4. Caffeine anhydrous market forecast

6. CAFFEINE ANHYDROUS MARKET PRICES

6.1. Caffeine anhydrous prices in Europe

6.2. Caffeine anhydrous prices in Asia

6.3. Caffeine anhydrous prices in North America

6.4. Caffeine anhydrous prices in other regions

7. CAFFEINE ANHYDROUS END-USE SECTOR

7.1. Caffeine anhydrous market by application sphere

7.2. Caffeine anhydrous downstream markets trends and prospects

*Please note that Caffeine anhydrous (CAS 58-08-2) Market Research Report 2026 is a half ready publication and contents are subject to change. It only requires updating with the help of new data that are constantly retrieved from Publisher's databases and other sources. This updating process takes 5-7 business days after order is placed. Thus, our clients always obtain a revised and updated version of each report. Please also note that we do not charge for such an updating procedure. BAC Reports has information for more than 25,000 different chemicals available but it is impossible to have all reports updated immediately. That is why it takes 5-7 days to update a report after an order is received.

About

Product Name:	Caffeine anhydrous
Synonyms:	Caffeine
	Natural Caffeine
	Caffeine Anhydrous Natural B.P. / E.P./ FCC / J.P. / U.S.P.
	Caffeine
	Caffein
	1,3,7-Trimethylxanthine
	3,7-Dihydro-1,3,7-trimethyl-1H- purine-2,6-dione
	Methyltheobromine
CAS#:	58-08-2
	5743-12-4
Formula:	$C_8H_{10}N_4O_2$
Molecular Weight:	194.19

Caffeine is a bitter, white crystalline xanthine alkaloid with the formula $C_8H_{10}N_4O_2$ acting as a stimulant drug and a reversible acetylcholinesterase inhibitor. Caffeine is naturally found in the leaves and seeds of many plants; it's also produced artificially and added to certain foods.

To date, caffeine is mainly used in food and drugs – from soft drinks, tea, chocolate, and coffee, to headache medication and "pep pills".

Caffeine is especially effective for headache, including migraine and headache following surgery, and is likely effective for mental alertness. Caffeine can possibly delay the onset of Parkinson's disease, prevent type 2 diabetes (when consumed from coffee or tea), promote weight loss when given with other drugs; etc.

Caffeine is also used as a decongestant and appetite suppressant. Controversial uses of this drug include killing skin fungi, improving sperm mobility, and enhancing the toxic effect of chemicals during cancer therapy.

The effects of caffeine on people depend on many factors including their size, weight and health and also whether they are used to taking it, and the amount taken.

To be noticed is that the use of any drug (including caffeine) always carries some risk — even medications can produce unwanted side effects.

Annual consumption of caffeine is estimated at 120,000 tonnes globally, making it the world's most popular psychoactive substance.

Natural caffeine market is covered in the study Natural Caffeine (CAS 58-08-2) Market Research Report 2012. The report encompasses proper description of the product, unveils application areas, and briefly summarizes patents in the sphere. It overlooks natural caffeine market situation, names manufacturers, suppliers as well as users. The report also provides current natural caffeine prices in the market.
