Autoclaved Aerated Concrete (AAC) Production Equipment refers to the machinery and systems used to manufacture AAC, a lightweight, precast building material known for its insulation, fire resistance, and durability. The equipment typically includes raw material preparation units, mixers, casting machines, cutting machines, autoclaves for high-pressure steam curing, and packaging systems. The production process involves mixing cement, lime, sand, water, and an expanding agent, which forms air bubbles, giving AAC its porous structure. Autoclaved curing enhances its strength and stability, making it a popular choice for construction applications such as blocks, panels, and lintels.
