Ambient lighting refers less to instrument panel lighting than to the indirect interior illumination that gives the driver a sense of orientation and spaciousness as well as feelings of safety, comfort, and even a sense of pride in value. Ambient lighting delivers an emotional atmosphere and, according to carmakers, ties together exterior and interior lighting conditions for the driver for decreased levels of driving fatigue.

Ambient lighting is now incorporated into innovative turn- and brake-lighting applications, backlit displays, occupancy detection, night vision, and more.

Ambient interior lighting can be adjusted to the point of becoming a fashion statement; primarily only in high-end vehicles from Audi, Cadillac, Infiniti, Jaguar, Mercedes-Benz, and BMW. However, this technology continues to work its way down the chain to lower-cost models, albeit slowly.

Automotive is a key driver of this industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their peak in the past 10 years, at 97.3 million and 95.89 million respectively. In 2018, the global economic expansion ended, and the global auto market declined as a whole. In 2022, there will wear units 81.6 million vehicles in the world. At present, more than 90% of the world's automobiles are concentrated in the three continents of Asia, Europe and North America, of which Asia automobile production accounts for 56% of the world, Europe accounts for 20%, and North America accounts for 16%. The world major automobile producing countries include China, the United States, Japan, South Korea, Germany, India, Mexico, and other countries; among them, China is the largest automobile producing country in the world, accounting for about 32%. Japan is the world's largest car exporter, exporting more than 3.5 million vehicles in 2022.
