Baby wipe dispensers are consumer childcare accessories designed to store wet wipes while enabling hygienic, single-sheet dispensing and moisture retention. They are widely used in households, nurseries, and on-the-go parenting scenarios to improve convenience and hygiene during infant care. In 2025, the average global selling price of baby wipe dispensers is approximately US$12.5 per unit, with global sales volume reaching around 92 million units. The baby wipe dispenser market has been experiencing steady growth in recent years. There are several key trends driving this market:Convenience and hygiene: Parents are increasingly looking for convenient and hygienic solutions for diaper changing and baby care.
