Date: October 2026
Pages: 75
Price: US$ 3,660.00 (Single User License)
ID: GD372BF8B57CEN

Abstracts

The global Bio-based Alanine market size is predicted to grow from US$ 178 million in 2025 to US$ 304 million in 2032; it is expected to grow at a CAGR of 7.9% from 2026 to 2032.

In 2025, global production of bio-based alanine was approximately 65,000 metric tons, with a global average market price of around $2,800 per metric ton. That year, total global production capacity for bio-based alanine reached 95,000 metric tons, and the industry's average gross profit margin stood at 22%. Bio-based alanine refers to alanine products manufactured using renewable biomass resources—such as sugars, starch, or sugarcane—as carbon sources through green processes like microbial fermentation, biotransformation, or enzymatic catalysis. Alanine is a naturally occurring ?-amino acid, with L-alanine being the form most widely used in the food, pharmaceutical, and nutritional sectors. Compared to traditionally chemically synthesized alanine, bio-based alanine offers advantages such as renewable raw materials, environmentally friendly production processes, lower carbon emissions, and high product purity, making it a key product in the biomanufacturing and green chemistry industries. Its applications span food flavoring agents, nutritional fortifiers, pharmaceutical intermediates, feed additives, cosmetic ingredients, and the synthesis of biomaterials. Driven by global advancements in biomanufacturing technology, rising consumer demand for healthy foods, and the chemical industry's transition toward low-carbon operations, the production of amino acids from biomass resources is increasingly becoming a vital alternative to traditional petrochemical-based production routes.

The upstream segment of the bio-based alanine industry chain primarily encompasses the supply of renewable carbon sources and fermentation raw materials, strain development, and the provision of fermentation auxiliary materials. Key raw materials include sugar-rich biomass resources such as glucose, corn starch, sugarcane molasses, and cassava starch, which are converted into carbon sources usable by

+357 96 030922
info@marketpublishers.com

microorganisms through processes like pretreatment and saccharification. Subsequently, fermentation is carried out using improved microbial strains (e.g., *Corynebacterium glutamicum* or engineered *Escherichia coli*), achieving efficient alanine synthesis through metabolic regulation. Critical upstream technologies include high-performance strain screening, metabolic engineering optimization, fermentation condition control, and the enhancement of raw material utilization efficiency. Since alanine production costs are largely determined by sugar source prices, strain efficiency, and fermentation energy consumption, enterprises possessing stable biomass supply systems and advanced strain development capabilities hold a distinct advantage within the industry chain. The midstream segment primarily covers the fermentation and manufacturing of bio-based alanine, as well as extraction and separation, purification and crystallization, and standardized product processing. During production, microorganisms utilize carbohydrate feedstocks to synthesize an alanine fermentation broth; high-purity alanine products are subsequently obtained through processes such as filtration, centrifugation, ion exchange, concentration, crystallization, and drying. Depending on application requirements, intermediate products can be further processed into food-grade, pharmaceutical-grade, feed-grade, and industrial-grade products. The food and pharmaceutical sectors impose stringent requirements regarding product purity, microbial control, heavy metal content, and production system compliance, thereby creating significant technical barriers to entry. Current industry competition focuses on improving fermentation conversion rates, reducing production costs, optimizing continuous production processes, and developing high-purity L-alanine products. Bio-based alanine has a wide range of downstream applications, with the food industry currently serving as a primary market. Possessing a sweet taste, L-alanine is used as a flavoring agent, umami enhancer, and nutritional fortifier in beverages, dairy products, food additives, and sports nutrition products. In the pharmaceutical sector, alanine serves as a key raw material for amino acid infusions, pharmaceutical intermediates, and biochemical reagents, and is also utilized in pharmaceutical R&D and cell culture systems. In the feed industry, alanine acts as an animal nutritional supplement, improving the amino acid balance of feed. Furthermore, driven by the development of bio-based materials and green chemistry, alanine is increasingly used in the production of polymer monomers, biodegradable materials, and fine chemicals. Looking ahead, downstream demand will be propelled by the growth of health foods, the expansion of the biopharmaceutical sector, the shift toward green chemical alternatives, and the upgrading of the biomanufacturing industry; high-value-added applications in the pharmaceutical and functional material sectors are poised to become new drivers of growth.

As an amino acid product manufactured via biotechnological routes such as microbial

+357 96 030922
info@marketpublishers.com

fermentation, bio-based alanine features renewable raw materials, an environmentally friendly production process, and low carbon emissions, aligning with the global chemical industry's shift toward green and low-carbon development. Driven by rising consumer demand for healthy, functional, and nutritionally fortified foods, alanine—serving as a sweetness modulator, umami enhancer, and nutritional supplement—is seeing expanded application in the food and beverage, sports nutrition, and dietary supplement sectors. Concurrently, the increasing emphasis placed by food enterprises and brands on sustainable sourcing, green supply chain development, and carbon footprint management is accelerating the gradual replacement of traditionally chemically synthesized products with bio-based amino acids.

In the pharmaceutical sector, alanine serves as a raw material for amino acid formulations, a component of biological culture media, an intermediate for drug synthesis, and a reagent for scientific research. The continued growth of the biopharmaceutical industry, advancements in cell culture technology, and increased investment in pharmaceutical R&D are driving a rising demand for high-purity, highly biocompatible amino acid raw materials. Furthermore, the scope of L-alanine's application is expanding within life science research and biomanufacturing, where it acts as a vital nutrient in cell culture systems and bioreaction processes. Looking ahead, pharmaceutical-grade and high-purity bio-based alanine will become key drivers of value creation, propelling the market beyond traditional food additives toward diverse, multi-sector applications.

Upgrades in fermentation technology and the optimization of biomanufacturing processes will drive the bio-based alanine industry toward greater efficiency and lower costs. Core competitiveness in bio-based alanine production hinges on strain performance, fermentation conversion efficiency, separation and purification technologies, and large-scale manufacturing capabilities. Future technological development will focus on metabolic engineering, the development of high-yielding strains, the application of continuous fermentation technology, and automated process control to boost unit yields while reducing energy and raw material consumption. Meanwhile, companies are exploring the use of non-food biomass, agricultural waste, and low-carbon sugar sources as feedstocks to reduce reliance on traditional grain resources and further lower the product's lifecycle carbon emissions. Enterprises possessing in-house strain R&D capabilities, an integrated fermentation supply chain, and efficient purification technologies will secure a competitive advantage in the market.

Report Scope

+357 96 030922
info@marketpublishers.com

LP Information, Inc. (LPI) ' newest research report, the “Bio-based Alanine Industry Forecast” looks at past sales and reviews total world Bio-based Alanine sales in 2025, providing a comprehensive analysis by region and market sector of projected Bio-based Alanine sales for 2026 through 2032. With Bio-based Alanine sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Bio-based Alanine industry.

This Insight Report provides a comprehensive analysis of the global Bio-based Alanine landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Bio-based Alanine portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms’ unique position in an accelerating global Bio-based Alanine market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Bio-based Alanine and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Bio-based Alanine.

This report presents a comprehensive overview, market shares, and growth opportunities of Bio-based Alanine market by product type, application, key manufacturers and key regions and countries.

Market Segmentation

Segmentation by Type:

L-alanine

DL-alanine

?-alanine

Segmentation by Raw Material Source:

+357 96 030922
info@marketpublishers.com

Food-crop Based Alanine

Non-food Biomass Based Alanine

Waste-derived Alanine

Segmentation by Purity Grade:

Industrial Grade

Medical Grade

Food Grade

Electronic Grade

Segmentation by Production Process Route:

Microbial Fermentation Method

Enzyme-catalyzed Method

Metabolic Engineering Modification Route

Segmentation by Application:

Chemical Manufacturing

Pharmaceutical

Food & Feed

Others

South Africa

Israel

Turkey

GCC Countries

The below companies that are profiled have been selected based on inputs gathered from primary experts and analysing the company's coverage, product portfolio, its market penetration.

Anhui Huaheng Biotechnology Co.,Ltd.

DMC Biotechnologies

Anhui BBCA biochemical

Key Questions Addressed in this Report

What is the 10-year outlook for the global Bio-based Alanine market?

What factors are driving Bio-based Alanine market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Bio-based Alanine market opportunities vary by end market size?

How does Bio-based Alanine break out by Type, by Application?

+357 96 030922
info@marketpublishers.com

Contents

1 SCOPE OF THE REPORT

1.1 Market Introduction
1.2 Years Considered
1.3 Research Objectives
1.4 Market Research Methodology
1.5 Research Process and Data Source
1.6 Economic Indicators
1.7 Currency Considered
1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview
  2.1.1 Global Bio-based Alanine Annual Sales 2021-2032
  2.1.2 World Current & Future Analysis for Bio-based Alanine by Geographic Region, 2021, 2025 & 2032
  2.1.3 World Current & Future Analysis for Bio-based Alanine by Country/Region, 2021, 2025 & 2032
2.2 Bio-based Alanine Segment by Type
  2.2.1 L-alanine
  2.2.2 DL-alanine
  2.2.3 ?-alanine
  2.2.4 Bio-based Alanine Sales by Type
    2.2.4.1 Global Bio-based Alanine Sales Market Share by Type (2021-2026)
    2.2.4.2 Global Bio-based Alanine Revenue and Market Share by Type (2021-2026)
    2.2.4.3 Global Bio-based Alanine Sale Price by Type (2021-2026)
2.3 Bio-based Alanine Segment by Raw Material Source
  2.3.1 Food-crop Based Alanine
  2.3.2 Non-food Biomass Based Alanine
  2.3.3 Waste-derived Alanine
  2.3.4 Bio-based Alanine Sales by Raw Material Source
    2.3.4.1 Global Bio-based Alanine Sales Market Share by Raw Material Source (2021-2026)
    2.3.4.2 Global Bio-based Alanine Revenue and Market Share by Raw Material Source (2021-2026)
    2.3.4.3 Global Bio-based Alanine Sale Price by Raw Material Source (2021-2026)

+357 96 030922
info@marketpublishers.com

2.4 Bio-based Alanine Segment by Purity Grade
2.4.1 Industrial Grade
2.4.2 Medical Grade
2.4.3 Food Grade
2.4.4 Electronic Grade
2.4.5 Bio-based Alanine Sales by Purity Grade
2.4.5.1 Global Bio-based Alanine Sales Market Share by Purity Grade (2021-2026)
2.4.5.2 Global Bio-based Alanine Revenue and Market Share by Purity Grade (2021-2026)
2.4.5.3 Global Bio-based Alanine Sale Price by Purity Grade (2021-2026)
2.5 Bio-based Alanine Segment by Production Process Route
2.5.1 Microbial Fermentation Method
2.5.2 Enzyme-catalyzed Method
2.5.3 Metabolic Engineering Modification Route
2.5.4 Bio-based Alanine Sales by Production Process Route
2.5.4.1 Global Bio-based Alanine Sales Market Share by Production Process Route (2021-2026)
2.5.4.2 Global Bio-based Alanine Revenue and Market Share by Production Process Route (2021-2026)
2.5.4.3 Global Bio-based Alanine Sale Price by Production Process Route (2021-2026)
2.6 Bio-based Alanine Segment by Application
2.6.1 Chemical Manufacturing
2.6.2 Pharmaceutical
2.6.3 Food & Feed
2.6.4 Others
2.6.5 Bio-based Alanine Sales by Application
2.6.5.1 Global Bio-based Alanine Sale Market Share by Application (2021-2026)
2.6.5.2 Global Bio-based Alanine Revenue and Market Share by Application (2021-2026)
2.6.5.3 Global Bio-based Alanine Sale Price by Application (2021-2026)

3 GLOBAL BY COMPANY

3.1 Global Bio-based Alanine Breakdown Data by Company
3.1.1 Global Bio-based Alanine Annual Sales by Company (2021-2026)
3.1.2 Global Bio-based Alanine Sales Market Share by Company (2021-2026)
3.2 Global Bio-based Alanine Annual Revenue by Company (2021-2026)
3.2.1 Global Bio-based Alanine Revenue by Company (2021-2026)

+357 96 030922
info@marketpublishers.com

3.2.2 Global Bio-based Alanine Revenue Market Share by Company (2021-2026)
3.3 Global Bio-based Alanine Sale Price by Company
3.4 Key Manufacturers Bio-based Alanine Producing Area Distribution, Sales Area, Product Type
3.4.1 Key Manufacturers Bio-based Alanine Product Location Distribution
3.4.2 Players Bio-based Alanine Products Offered
3.5 Market Concentration Rate Analysis
3.5.1 Competition Landscape Analysis
3.5.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)
3.6 New Products and Potential Entrants
3.7 Market M&A Activity & Strategy

4 WORLD HISTORIC REVIEW FOR BIO-BASED ALANINE BY GEOGRAPHIC REGION

4.1 World Historic Bio-based Alanine Market Size by Geographic Region (2021-2026)
4.1.1 Global Bio-based Alanine Annual Sales by Geographic Region (2021-2026)
4.1.2 Global Bio-based Alanine Annual Revenue by Geographic Region (2021-2026)
4.2 World Historic Bio-based Alanine Market Size by Country/Region (2021-2026)
4.2.1 Global Bio-based Alanine Annual Sales by Country/Region (2021-2026)
4.2.2 Global Bio-based Alanine Annual Revenue by Country/Region (2021-2026)
4.3 Americas Bio-based Alanine Sales Growth
4.4 APAC Bio-based Alanine Sales Growth
4.5 Europe Bio-based Alanine Sales Growth
4.6 Middle East & Africa Bio-based Alanine Sales Growth

5 AMERICAS

5.1 Americas Bio-based Alanine Sales by Country
5.1.1 Americas Bio-based Alanine Sales by Country (2021-2026)
5.1.2 Americas Bio-based Alanine Revenue by Country (2021-2026)
5.2 Americas Bio-based Alanine Sales by Type (2021-2026)
5.3 Americas Bio-based Alanine Sales by Application (2021-2026)
5.4 United States
5.5 Canada
5.6 Mexico
5.7 Brazil

6 APAC

+357 96 030922
info@marketpublishers.com

6.1 APAC Bio-based Alanine Sales by Region
6.1.1 APAC Bio-based Alanine Sales by Region (2021-2026)
6.1.2 APAC Bio-based Alanine Revenue by Region (2021-2026)
6.2 APAC Bio-based Alanine Sales by Type (2021-2026)
6.3 APAC Bio-based Alanine Sales by Application (2021-2026)
6.4 China
6.5 Japan
6.6 South Korea
6.7 Southeast Asia
6.8 India
6.9 Australia
6.10 China Taiwan

7 EUROPE

7.1 Europe Bio-based Alanine by Country
7.1.1 Europe Bio-based Alanine Sales by Country (2021-2026)
7.1.2 Europe Bio-based Alanine Revenue by Country (2021-2026)
7.2 Europe Bio-based Alanine Sales by Type (2021-2026)
7.3 Europe Bio-based Alanine Sales by Application (2021-2026)
7.4 Germany
7.5 France
7.6 UK
7.7 Italy
7.8 Russia

8 MIDDLE EAST & AFRICA

8.1 Middle East & Africa Bio-based Alanine by Country
8.1.1 Middle East & Africa Bio-based Alanine Sales by Country (2021-2026)
8.1.2 Middle East & Africa Bio-based Alanine Revenue by Country (2021-2026)
8.2 Middle East & Africa Bio-based Alanine Sales by Type (2021-2026)
8.3 Middle East & Africa Bio-based Alanine Sales by Application (2021-2026)
8.4 Egypt
8.5 South Africa
8.6 Israel
8.7 Turkey
8.8 GCC Countries

9 MARKET DRIVERS, CHALLENGES AND TRENDS

9.1 Market Drivers & Growth Opportunities
9.2 Market Challenges & Risks
9.3 Industry Trends

10 MANUFACTURING COST STRUCTURE ANALYSIS

10.1 Raw Material and Suppliers
10.2 Manufacturing Cost Structure Analysis of Bio-based Alanine
10.3 Manufacturing Process Analysis of Bio-based Alanine
10.4 Industry Chain Structure of Bio-based Alanine

11 MARKETING, DISTRIBUTORS AND CUSTOMER

11.1 Sales Channel
  11.1.1 Direct Channels
  11.1.2 Indirect Channels
11.2 Bio-based Alanine Distributors
11.3 Bio-based Alanine Customer

12 WORLD FORECAST REVIEW FOR BIO-BASED ALANINE BY GEOGRAPHIC REGION

12.1 Global Bio-based Alanine Market Size Forecast by Region
  12.1.1 Global Bio-based Alanine Forecast by Region (2027-2032)
  12.1.2 Global Bio-based Alanine Annual Revenue Forecast by Region (2027-2032)
12.2 Americas Forecast by Country (2027-2032)
12.3 APAC Forecast by Region (2027-2032)
12.4 Europe Forecast by Country (2027-2032)
12.5 Middle East & Africa Forecast by Country (2027-2032)
12.6 Global Bio-based Alanine Forecast by Type (2027-2032)
12.7 Global Bio-based Alanine Forecast by Application (2027-2032)

13 KEY PLAYERS ANALYSIS

13.1 Anhui Huaheng Biotechnology Co.,Ltd.
  13.1.1 Anhui Huaheng Biotechnology Co.,Ltd. Company Information

+357 96 030922

I would like to order

Product name: Global Bio-based Alanine Market Growth 2026-2032

Product link: https://marketpublishers.com/r/GD372BF8B57CEN.html

Price: US$ 3,660.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page https://marketpublishers.com/r/GD372BF8B57CEN.html
