Abstracts

The global GM Cryocooler Cold Heads market size is predicted to grow from US$ 262 million in 2025 to US$ 379 million in 2032; it is expected to grow at a CAGR of 5.3% from 2026 to 2032.

GM Cryocooler Cold Heads are the core cold-end assemblies that directly generate and deliver refrigeration in Gifford–McMahon cooling systems. A cold head is normally connected to a helium compressor through high- and low-pressure helium lines. The compressor supplies purified high-pressure helium, while the rotary valve, cylinder, displacer, regenerator, and cold-end heat exchangers inside the cold head operate cyclically to cool the helium through expansion and transfer refrigeration to a superconducting magnet, sample stage, cryopanel, or other thermal load. The standalone cold-head market includes cold heads delivered with new systems, independently sold cold heads, spare units, replacement units, and factory-refurbished or exchange units. It excludes helium compressors, helium lines, power controllers, complete cryopumps, complete cryostats, and other peripheral systems.

In 2025, global GM Cryocooler Cold Heads production reached approximately 18.7 k units, with an average global market price of around US$ 14.4 k per unit

The principal upstream materials include austenitic stainless steel for cylinders, housings, regenerator tubes, and vacuum-compatible structures; oxygen-free high-conductivity copper for cold-end heat exchangers, cold stages, and thermal links; aluminum alloys for lightweight components; engineering polymers, glass-fiber composites, and polyimide materials for displacers and thermally isolating structures; stainless-steel mesh, high-heat-capacity lead-based materials, and rare-earth intermetallic compounds for regenerators; and precision bearings, rotary valves, motors,

+357 96 030922
info@marketpublishers.com

seals, vacuum brazing materials, cryogenic coatings, and high-purity helium. Representative upstream suppliers include Outokumpu, Nippon Steel, and POSCO for stainless steel; Aurubis, Mitsubishi Materials, and KME for oxygen-free copper; TDK, Shin-Etsu Chemical, and Proterial for magnetic and rare-earth materials; Parker Hannifin and Trelleborg for sealing products; SKF, NSK, and Schaeffler for precision bearings; and Linde, Air Liquide, and Air Products for high-purity helium. These companies should be viewed as representative material and component suppliers rather than publicly confirmed direct suppliers to every cold-head manufacturer.

Downstream customers primarily comprise MRI and NMR equipment manufacturers, scientific-instrument and laboratory-cryostat manufacturers, cryopump and semiconductor-vacuum-equipment companies, and integrators of superconducting, gas-liquefaction, and specialized cryogenic systems. Representative MRI and NMR customers and system integrators include Siemens Healthineers, GE HealthCare, Philips, Canon Medical Systems, United Imaging, and Bruker. Scientific-instrument customers include Oxford Instruments, Quantum Design, Lake Shore, Janis, Bluefors, Oxford Cryosystems, universities, national laboratories, and research institutes. Cryopump and vacuum-system customers include Edwards Vacuum, ULVAC CRYOGENICS, SHI, Applied Materials, Lam Research, Tokyo Electron, Canon Anelva, and optical-coating-equipment manufacturers. Other potential customers include superconducting-cable and magnet manufacturers, helium-liquefaction equipment companies, industrial-gas suppliers, and aerospace research organizations. These names represent equipment manufacturers, integrators, or potential downstream customers and should not automatically be interpreted as publicly confirmed direct purchasers from every cold-head supplier.

The gross margin for GM Cryocooler Cold Heads is approximately 25%–45%.

By principal rated temperature or minimum operating temperature, the market is divided into Under 10K or 10K, 10.1K-30K, and Above 30K. For a two-stage cold head, classification should be based on the coldest rated stage; for a single-stage model, it should be based on the principal rated operating temperature. Under 10K or 10K products include 2K, 4K, and 10K cold heads, are generally based on two-stage architectures, carry relatively high technical barriers and unit values, and are principally used in MRI and NMR, superconducting magnets, helium recondensation, and low-temperature research. ULVAC offers cold heads with rated capacity at 4.2K, while SHI supplies 2K, 4K, and 10K product series. The 10.1K-30K segment mainly includes cold heads operating around 20K and combines relatively high cooling capacity with applications in hydrogen liquefaction, high-temperature superconductivity, research

+357 96 030922
info@marketpublishers.com

cryostats, and selected cryogenic-vacuum equipment. Bluefors' Cryomech GM portfolio primarily covers 20K-80K, while Oxford Cryosystems offers two-stage products rated around 20K. Above 30K products cover approximately 40K, 50K, 65K, 77K, and higher temperature ranges and are commonly used for cryopump radiation shields, higher-temperature condensation surfaces, high-temperature superconducting equipment, nitrogen and argon liquefaction, cryogenic traps, and high-heat-load precooling.

MRI and NMR primarily use two-stage cold heads in the Under 10K or 10K segment to conductively cool superconducting magnets or recondense helium. These systems require continuous operation, low failure rates, stable cooling capacity near 4.2K, and mature global service capabilities. Scientific Instruments and Laboratory Cryostats include materials-characterization systems, cryogenic optical platforms, superconductivity research, magnetotransport, Hall-effect measurements, quantum-device testing, and laboratory cryostats; these applications can use products from all three temperature categories depending on sample temperature and thermal load. Cryopumps and Vacuum Systems normally use surfaces around 10K-20K to condense nitrogen, oxygen, and argon, together with radiation shields and adsorption structures operating around 50K-80K, and principally serve semiconductor, flat-panel-display, optical-coating, and research-vacuum systems. Others include high-temperature superconducting cables and magnets, helium and hydrogen liquefiers, cryogenic traps, infrared and optoelectronic devices, cryogenic electronics, aerospace equipment, and specialized industrial cooling systems.

Leading suppliers include Sumitomo Heavy Industries (SHI) and ULVAC CRYOGENICS of Japan; Edwards Vacuum and Oxford Cryosystems of the United Kingdom; Bluefors (Cryomech) of Finland; Pengli Technology, Bwokai Technologies, Suzhou Bama Superconductive Technology, and Hynhe of China; and Advanced Research System of the United States. SHI offers a broad portfolio covering 2K, 4K, 10K, 20K, 40K, and 77K temperature ranges and has a strong presence in MRI, superconducting magnets, research, and industrial cryogenics. Edwards Vacuum and ULVAC CRYOGENICS have established positions in cryopumps and semiconductor vacuum equipment. Bluefors (Cryomech) emphasizes high-capacity 20K-80K products, scientific equipment, and gas-liquefaction applications. Pengli Technology has developed product series for liquid-helium temperatures, 20K-30K, and 77K. Bwokai Technologies supplies 4K cold heads, cryopumps, and cryogenic traps. Suzhou Bama offers products rated at 4.2K and 20K together with cryopump systems. Hynhe continues to expand its 4K and high-capacity GM portfolio. Advanced Research System focuses on laboratory cryostats, ultra-high-vacuum cold heads, and customized research platforms, while Oxford Cryosystems supplies single-stage and two-stage cold heads together with multidrive compressor

+357 96 030922
info@marketpublishers.com

configurations.

Market growth is supported by the transition of MRI and NMR equipment toward reduced-helium, recondensing, and higher-uptime architectures; expansion of quantum technology, superconductivity research, low-temperature materials testing, and cryogen-free laboratory systems; additional demand for cryopumps from semiconductor wafer fabrication, display manufacturing, optical coating, and vacuum heat-treatment equipment; development of high-temperature superconducting cables, magnetic levitation, superconducting motors, fusion research, and high-field magnets; helium price volatility and supply concerns that encourage hospitals and laboratories to adopt recondensing systems; growth in hydrogen energy and cryogenic-fuel infrastructure, creating opportunities for high-capacity products around 20K; localization of critical cryogenic equipment and supply chains in China and other regions; and an expanding installed base of MRI systems, cryopumps, and scientific instruments that generates recurring maintenance, replacement, and factory-refurbishment demand.

The market is constrained by demanding expertise in regenerative-cycle design, rare-earth regenerator materials, micron-level machining, low-wear seals, vacuum brazing, cryogenic coatings, and helium purification; high development, testing, and manufacturing-equipment costs; lengthy reliability validation and customer-qualification cycles in MRI, semiconductor, and major scientific equipment; periodic maintenance requirements associated with displacers, seals, and rotary valves; limited cross-brand interchangeability because cold heads must match compressor pressure, helium flow, operating frequency, hose interfaces, and control logic; performance deterioration caused by helium leakage, contamination, or excessive oil carryover; supply and cost volatility for oxygen-free copper, specialty stainless steel, precision bearings, sealing materials, and rare-earth regenerator compounds; electricity consumption, cooling-water or air-cooling requirements, noise, and equipment-space constraints; competition from pulse tube cryocoolers in low-vibration research applications; and continued use of liquid nitrogen, liquid helium, or other stored cryogens in applications with limited operating hours.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the “GM Cryocooler Cold Heads Industry Forecast” looks at past sales and reviews total world GM Cryocooler Cold Heads sales in 2025, providing a comprehensive analysis by region and market sector of projected GM Cryocooler Cold Heads sales for 2026 through 2032. With GM Cryocooler Cold Heads sales broken down by region, market sector and sub-sector, this

+357 96 030922
info@marketpublishers.com

report provides a detailed analysis in US$ millions of the world GM Cryocooler Cold Heads industry.

This Insight Report provides a comprehensive analysis of the global GM Cryocooler Cold Heads landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on GM Cryocooler Cold Heads portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global GM Cryocooler Cold Heads market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for GM Cryocooler Cold Heads and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global GM Cryocooler Cold Heads.

This report presents a comprehensive overview, market shares, and growth opportunities of GM Cryocooler Cold Heads market by product type, application, key manufacturers and key regions and countries.

Market Segmentation

Segmentation by Type:

Under 10K or 10K

10.1K-30K

Above 30K

Segmentation by Number of Cooling Stages:

Single-Stage Gifford-McMahon Cryocooler Cold Head

Two-Stage Gifford-McMahon Cryocooler Cold Head

+357 96 030922
info@marketpublishers.com

Segmentation by End-Use Industry:

Semiconductor and Electronic Device Manufacturing

Medical and Life Sciences

Research and Development

Energy and Superconducting Technology

Industrial Gases and Cryogenic Processing

Others

Segmentation by Application:

MRI and NMR

Scientific Instruments and Laboratory Cryostats

Cryopumps and Vacuum Systems

Others

This report also splits the market by region:

Americas

United States

Canada

Mexico

The below companies that are profiled have been selected based on inputs gathered from primary experts and analysing the company's coverage, product portfolio, its market penetration.

Sumitomo Heavy Industries (SHI)

Edwards Vacuum LLC

ULVAC CRYOGENICS

Bluefors (Cryomech)

Pengli Technology

Bwokai Technologies

Suzhou Bama Superconductive Technology

Hynhe

Advanced Research System

Oxford Cryosystems

Key Questions Addressed in this Report

What is the 10-year outlook for the global GM Cryocooler Cold Heads market?

What factors are driving GM Cryocooler Cold Heads market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do GM Cryocooler Cold Heads market opportunities vary by end market size?

+357 96 030922
info@marketpublishers.com

How does GM Cryocooler Cold Heads break out by Type, by Application?

+357 96 030922

Contents

1 SCOPE OF THE REPORT

1.1 Market Introduction
1.2 Years Considered
1.3 Research Objectives
1.4 Market Research Methodology
1.5 Research Process and Data Source
1.6 Economic Indicators
1.7 Currency Considered
1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview
  2.1.1 Global GM Cryocooler Cold Heads Annual Sales 2021-2032
  2.1.2 World Current & Future Analysis for GM Cryocooler Cold Heads by Geographic Region, 2021, 2025 & 2032
  2.1.3 World Current & Future Analysis for GM Cryocooler Cold Heads by Country/Region, 2021, 2025 & 2032
2.2 GM Cryocooler Cold Heads Segment by Type
  2.2.1 Under 10K or 10K
  2.2.2 10.1K-30K
  2.2.3 Above 30K
  2.2.4 GM Cryocooler Cold Heads Sales by Type
    2.2.4.1 Global GM Cryocooler Cold Heads Sales Market Share by Type (2021-2026)
    2.2.4.2 Global GM Cryocooler Cold Heads Revenue and Market Share by Type (2021-2026)
    2.2.4.3 Global GM Cryocooler Cold Heads Sale Price by Type (2021-2026)
2.3 GM Cryocooler Cold Heads Segment by Number of Cooling Stages
  2.3.1 Single-Stage Gifford-McMahon Cryocooler Cold Head
  2.3.2 Two-Stage Gifford-McMahon Cryocooler Cold Head
  2.3.3 GM Cryocooler Cold Heads Sales by Number of Cooling Stages
    2.3.3.1 Global GM Cryocooler Cold Heads Sales Market Share by Number of Cooling Stages (2021-2026)
    2.3.3.2 Global GM Cryocooler Cold Heads Revenue and Market Share by Number of Cooling Stages (2021-2026)
    2.3.3.3 Global GM Cryocooler Cold Heads Sale Price by Number of Cooling Stages

(2021-2026)
2.4 GM Cryocooler Cold Heads Segment by End-Use Industry
2.4.1 Semiconductor and Electronic Device Manufacturing
2.4.2 Medical and Life Sciences
2.4.3 Research and Development
2.4.4 Energy and Superconducting Technology
2.4.5 Industrial Gases and Cryogenic Processing
2.4.6 Others
2.4.7 GM Cryocooler Cold Heads Sales by End-Use Industry
2.4.7.1 Global GM Cryocooler Cold Heads Sales Market Share by End-Use Industry (2021-2026)
2.4.7.2 Global GM Cryocooler Cold Heads Revenue and Market Share by End-Use Industry (2021-2026)
2.4.7.3 Global GM Cryocooler Cold Heads Sale Price by End-Use Industry (2021-2026)
2.5 GM Cryocooler Cold Heads Segment by Application
2.5.1 MRI and NMR
2.5.2 Scientific Instruments and Laboratory Cryostats
2.5.3 Cryopumps and Vacuum Systems
2.5.4 Others
2.5.5 GM Cryocooler Cold Heads Sales by Application
2.5.5.1 Global GM Cryocooler Cold Heads Sale Market Share by Application (2021-2026)
2.5.5.2 Global GM Cryocooler Cold Heads Revenue and Market Share by Application (2021-2026)
2.5.5.3 Global GM Cryocooler Cold Heads Sale Price by Application (2021-2026)

3 GLOBAL BY COMPANY

3.1 Global GM Cryocooler Cold Heads Breakdown Data by Company
3.1.1 Global GM Cryocooler Cold Heads Annual Sales by Company (2021-2026)
3.1.2 Global GM Cryocooler Cold Heads Sales Market Share by Company (2021-2026)
3.2 Global GM Cryocooler Cold Heads Annual Revenue by Company (2021-2026)
3.2.1 Global GM Cryocooler Cold Heads Revenue by Company (2021-2026)
3.2.2 Global GM Cryocooler Cold Heads Revenue Market Share by Company (2021-2026)
3.3 Global GM Cryocooler Cold Heads Sale Price by Company
3.4 Key Manufacturers GM Cryocooler Cold Heads Producing Area Distribution, Sales

I would like to order

Product name: Global GM Cryocooler Cold Heads Market Growth 2026-2032

Product link: https://marketpublishers.com/r/GC3CC93DD08DEN.html

Price: US$ 3,660.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page https://marketpublishers.com/r/GC3CC93DD08DEN.html
