The global Car Drying Towel market size is predicted to grow from US$ 922 million in 2025 to US$ 1492 million in 2032; it is expected to grow at a CAGR of 7.1% from 2026 to 2032.

Car drying towels are specialized cleaning accessories designed to absorb water quickly and safely remove moisture from vehicle surfaces after washing. These towels are typically made from microfiber, twisted-loop fibers, waffle-weave fabrics, or other high-absorbency materials that minimize scratching and water spotting on automotive paint, glass, and trim surfaces. Compared with traditional cotton towels, modern car drying towels offer higher absorbency, faster drying performance, and improved durability. From a value chain perspective, upstream includes synthetic fiber materials such as polyester and polyamide, textile yarn production, and microfiber fabric processing; midstream focuses on weaving, dyeing, cutting, stitching, and product finishing; downstream demand comes from car care product brands, automotive detailing services, car wash centers, and retail consumers purchasing cleaning accessories for vehicle maintenance. In 2025, the average selling price of car drying towels is approximately US$6.5 per unit, with global sales volume reaching around 145 million units. The industry maintains a gross margin of 28%?45%, supported by growing consumer interest in vehicle care and premium microfiber products.

The car drying towel market is experiencing steady growth driven by the expansion of the automotive detailing and DIY car care sectors. Microfiber materials continue to dominate the market due to their superior water absorption, softness, and scratch-free performance compared with traditional cotton towels. High-GSM microfiber towels, twisted-loop drying towels, and extra-large drying cloths are becoming increasingly popular among professional detailing services and car enthusiasts. In addition, environmentally friendly materials and reusable cleaning products are gaining attention as consumers seek sustainable alternatives to disposable car care products. E-
