

Flame Retardant (CAS 1309-64-4) Market Research Report 2026

<https://marketpublishers.com/r/FA8AFD9DFF0EN.html>

Date: June 2026

Pages: 50

Price: US\$ 2,200.00 (Single User License)

ID: FA8AFD9DFF0EN

Abstracts

Flame Retardant (CAS 1309-64-4) Market Research Report 2026 presents comprehensive data on Flame Retardant markets globally and regionally (Europe, Asia, North America etc.)

The report includes Flame Retardant description, covers its application areas and related patterns. It overviews Flame Retardant market, names Flame Retardant producers and indicates its suppliers.

Besides, the report provides Flame Retardant prices in regional markets.

In addition to the above the report determines Flame Retardant consumers in the market.

BAC Reports offers its clients in-depth market research of chemical industry products on the global and regional markets (North & Latin America, Asia Pacific, European Union, Russia and CIS).

We can analyze the following elements for each chemical product in any country or region:

capacities and production

consumption volume and structure

market price trends

exports and imports

existing technologies

feedstock market condition

market news digest

market forecast.

Flame Retardant (CAS 1309-64-4) Market Research Report 2026 can feature:

market condition and estimations, market forecast

chemical product ranges, trademarks, analogous products, application areas

regional and global producers, consumers and traders (including contact details).

Contents

1. FLAME RETARDANT (CAS 1309-64-4)

- 1.1. General information, synonyms
- 1.2. Composition, chemical structure
- 1.3. Safety information
- 1.4. Hazards identification
- 1.5. Handling and storage
- 1.6. Toxicological & ecological information
- 1.7. Transport information

2. FLAME RETARDANT APPLICATIONS

- 2.1. Flame Retardant application spheres, downstream products

3. FLAME RETARDANT MANUFACTURING METHODS

4. FLAME RETARDANT PATENTS

- Abstract
- Description
- Summary of the invention
- Detailed description of the invention

5. FLAME RETARDANT MARKET WORLDWIDE

- 5.1. General Flame Retardant market situation, trends
- 5.2. Manufacturers of Flame Retardant
 - Europe
 - Asia
 - North America
 - Other regions
- 5.3. Flame Retardant suppliers (importers, local distributors)
 - Europe
 - Asia
 - North America
 - Other regions

5.4. Flame Retardant market forecast

6. FLAME RETARDANT MARKET PRICES

6.1. Flame Retardant prices in Europe

6.2. Flame Retardant prices in Asia

6.3. Flame Retardant prices in North America

6.4. Flame Retardant prices in other regions

7. FLAME RETARDANT END-USE SECTOR

7.1. Flame Retardant market by application sphere

7.2. Flame Retardant downstream markets trends and prospects

*Please note that Flame Retardant (CAS 1309-64-4) Market Research Report 2026 is a half ready publication and contents are subject to change. It only requires updating with the help of new data that are constantly retrieved from Publisher's databases and other sources. This updating process takes 5-7 business days after order is placed. Thus, our clients always obtain a revised and updated version of each report. Please also note that we do not charge for such an updating procedure. BAC Reports has information for more than 25,000 different chemicals available but it is impossible to have all reports updated immediately. That is why it takes 5-7 days to update a report after an order is received.

About

Product Name:	Flame Retardant
Synonyms:	High Purity Grade Antimony Trioxide
	ANTIMONOUS OXIDE
	Antimony(III) Oxide
	Antimony trioxide
	Diantimony trioxide
	Sell-Jiefu Antimony Trioxide

CAS#:	1309-64-4
Formula:	O_3Sb_2
Molecular Weight:	291.52

Antimony(III) oxide (antimony trioxide, diantimony trioxide, dioxodistiboxane) is the most widely produced inorganic compound of antimony, with the formula O_3Sb_2 . Like most polymeric oxides, antimony trioxide dissolves in aqueous solutions only with hydrolysis.

Antimony trioxide can be found in nature as the minerals valentinite and senarmontite, or it can be human-made – mainly from stibnite ores (antimony trisulfide) or as a by-product of lead smelting and production.

The key application of antimony trioxide is for flame retardants in combination with halogenated materials. To achieve the same amount of fire protection, only half as much halogen is needed in case the antimony synergist is included. Such flame retardants are found in electrical apparatus, textiles, leather, and coatings.

Antimony trioxide is a useful catalyst in the manufacture of polyethylene terephthalate (PET plastic). Antimony trioxide used for this purpose is usually of higher purity than the product used for glass or flame retardants. There are other choices that work better as catalysts, however, but they are prohibitively expensive.

Antimony oxide also finds application in the glass industry as a clarifying agent. The product is added during the meltdown process to remove any undesired bubbles, inclusions or color.

Because it is a white powder, antimony trioxide is often used as an opacifier for the porcelain and enamel industries. Antimony trioxide is also used as a chemical intermediate for the production of other antimony compounds. It is used as a phosphorescent agent in fluorescent light bulbs. The product is added to fluid lubricants to increase stability, as well as to molybdenum disulfide to decrease friction and wear.

China takes the lead in antimony trioxide production globally, although countries like the US, Mexico, South Africa, Bolivia, Russia, Europe and Japan also make it.

Antimony(III) oxide market is covered in the study Antimony(III) Oxide (CAS 1309-64-4) Market Research Report 2012. The report encompasses proper description of the product, unveils application areas, and briefly summarizes patents in the sphere. It overlooks antimony(III) oxide market situation, names manufacturers, suppliers as well as users. The report also provides current antimony(III) oxide prices in the market.
