The global Compression Sportswear market size is predicted to grow from US$ 4880 million in 2025 to US$ 13350 million in 2031; it is expected to grow at a CAGR of 18.3% from 2025 to 2031.

Compression sportswear is a kind of functional sportswear made of high-tech woven fabrics. It uses special compression materials to wrap and support key sports muscle groups, which can reduce muscle vibration, support core muscle groups, thereby reducing the risk of sports injuries and improving sports performance.

The global sports compression clothing market has continued to grow in the past few years and is expected to maintain a steady growth in the next few years. The Asia-Pacific region is one of the world's largest sports compression clothing markets, accounting for a high market share, mainly due to the rapid economic development in the region and consumers' pursuit of a healthy life. In emerging markets such as China, as consumers' demand for high-quality sports equipment continues to increase, the compression sportswear market is showing a rapid growth trend.
