Abstracts

The global Mobile Gym Franchise market size is predicted to grow from US$ million in 2025 to US$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

A mobile gym franchise is a business model where a fitness company offers gym services and equipment on wheels. Instead of having a fixed location, the gym is set up in a specially designed vehicle that can travel to different locations, such as office parks, residential areas, or events. This allows people to access fitness facilities and classes conveniently without the need to travel to a traditional gym. Mobile gym franchises typically offer a range of fitness services, including personal training, group classes, and equipment rental.

According to our Wellness & Health Research Center, the global wellness & health economy was valued at US dollars 4.8 trillion. Asia Pacific was the region with the highest spending on big health in 2022, with a total spending of $1.68 trillion, followed by North America ($1.42 trillion) and Europe ($1.0 trillion). According to the health industry accounting analysis data disclosed by the Health Development Research Center of the National Health Commission, from 2019 to 2021, the market size of the health service industry grew by an average of 7.0% per year, and the specific data increased from 7.7 trillion yuan to 8.8 trillion yuan. China's health industry revenue reached 8.0 trillion yuan in 2021, with an increase of 8.1%.
