

# Isostearic Acid (CAS 2724-58-5) Market Research Report 2025

<https://marketpublishers.com/r/I286355271CEN.html>

Date: May 2025

Pages: 70

Price: US\$ 2,200.00 (Single User License)

ID: I286355271CEN

## Abstracts

Isostearic Acid (CAS 2724-58-5) Market Research Report 2025 presents comprehensive data on Isostearic Acid markets globally and regionally (Europe, Asia, North America etc.)

The report includes Isostearic Acid description, covers its application areas and related patterns. It overviews Isostearic Acid market, names Isostearic Acid producers and indicates its suppliers.

Besides, the report provides Isostearic Acid prices in regional markets.

In addition to the above the report determines Isostearic Acid consumers in the market.

BAC Reports offers its clients in-depth market research of chemical industry products on the global and regional markets (North & Latin America, Asia Pacific, European Union, Russia and CIS).

We can analyze the following elements for each chemical product in any country or region:

capacities and production

consumption volume and structure

market price trends

exports and imports

existing technologies

feedstock market condition

market news digest

market forecast.

Isostearic Acid (CAS 2724-58-5) Market Research Report 2025 can feature:

market condition and estimations, market forecast

chemical product ranges, trademarks, analogous products, application areas

regional and global producers, consumers and traders (including contact details).

## Contents

### **1. ISOSTEARIC ACID (CAS 2724-58-5)**

- 1.1. General information, synonyms
- 1.2. Composition, chemical structure
- 1.3. Safety information
- 1.4. Hazards identification
- 1.5. Handling and storage
- 1.6. Toxicological & ecological information
- 1.7. Transport information

### **2. ISOSTEARIC ACID APPLICATIONS**

- 2.1. Isostearic Acid application spheres, downstream products

### **3. ISOSTEARIC ACID MANUFACTURING METHODS**

### **4. ISOSTEARIC ACID PATENTS**

- Abstract
- Description
- Summary of the invention
- Detailed description of the invention

### **5. ISOSTEARIC ACID MARKET WORLDWIDE**

- 5.1. General Isostearic Acid market situation, trends
- 5.2. Manufacturers of Isostearic Acid
  - Europe
  - Asia
  - North America
  - Other regions
- 5.3. Isostearic Acid suppliers (importers, local distributors)
  - Europe
  - Asia
  - North America
  - Other regions

#### 5.4. Isostearic Acid market forecast

### **6. ISOSTEARIC ACID MARKET PRICES**

#### 6.1. Isostearic Acid prices in Europe

#### 6.2. Isostearic Acid prices in Asia

#### 6.3. Isostearic Acid prices in North America

#### 6.4. Isostearic Acid prices in other regions

### **7. ISOSTEARIC ACID END-USE SECTOR**

#### 7.1. Isostearic Acid market by application sphere

#### 7.2. Isostearic Acid downstream markets trends and prospects

\*Please note that Isostearic Acid (CAS 2724-58-5) Market Research Report 2025 is a half ready publication and contents are subject to change. It only requires updating with the help of new data that are constantly retrieved from Publisher's databases and other sources. This updating process takes 5-7 business days after order is placed. Thus, our clients always obtain a revised and updated version of each report. Please also note that we do not charge for such an updating procedure. BAC Reports has information for more than 25,000 different chemicals available but it is impossible to have all reports updated immediately. That is why it takes 5-7 days to update a report after an order is received.

## About

Product Name: Isostearic Acid

Synonyms:

ISOSTEARIC ACID

16-Methylheptadecanoic acid

Isooctadecanoic acid

Isostearic acid

CAS#:

2724-58-5

30399-84-9

Formula:  $C_{18}H_{36}O_2$

Molecular Weight: 284.48

A methyl-branched fatty acid derived from oils and fats of natural origin, isostearic acid has the molecular formula  $C_{18}H_{36}O_2$ . It is used in an array of industries, with the cosmetics and personal care products manufacturers being the number one buyers.

Isostearic acid is characterized by light colour, good fluidity as well as temperature properties, outstanding oxidative and thermal stability. It is soluble in chloroform and has a flash point of 225.6°C.

Isostearic acids are obtained by polymerization of fatty acids. To be more precise, they are generated by heating oleic acid in front of a catalyst (e.g. clay) in order to produce dimeric and trimeric products.

Isostearic acids are widely utilized as a binder in a large variety of skin and beauty products given their ability to protect skin from the oxidative damage and the absence of the negative effect on human health. They can be found in lipsticks, hair colorants, deodorant sticks, shaving products, liquid laundry detergents, etc. Isostearic acids are also used in surfactants such as oil/water emulsifiers, mold release agents, anti-static additives, and a lot more. Besides, they are used in solvents, high performance

lubricants, coating and ink resins, and heat stabilizers for PVC, among others.

Isostearic acid is produced the world over, but the lion's share of the global market belongs to Europe, which is followed by the USA and Asia.

The isostearic acid market is covered in the report *Isostearic Acid (CAS 2724-58-5) Market Research Report 2025*. The report encompasses proper description of the product, unveils application areas, and briefly summarizes patents in the sphere. It overlooks the isostearic acid market situation, names manufacturers, suppliers as well as users. The report also provides current isostearic acid prices.

## I would like to order

Product name: Isostearic Acid (CAS 2724-58-5) Market Research Report 2025

Product link: <https://marketpublishers.com/r/l286355271CEN.html>

Price: US\$ 2,200.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
