Electric Garage Heater is an electric heating device specially designed for garages and other spaces. It converts electrical energy into heat energy to provide heating for the garage, solving the needs of equipment protection and comfortable operation in low-temperature environments. It is mainly used in semi-open or closed spaces such as residential garages, commercial garages, workshops, and storage rooms, especially in low-temperature areas in winter, to solve problems such as difficulty in cold starting of vehicles, freezing damage to equipment, and cold working conditions for personnel.

With people's pursuit of quality of life and the change of home decoration concepts, more and more people are transforming garages into multi-functional spaces, such as studios, gyms, and entertainment rooms, which increases the demand for a comfortable garage environment and promotes the development of the electric garage heater market. In addition, small commercial places, such as small repair shops and handicraft workshops, also tend to use electric garage heaters to create a comfortable working environment, further expanding the market demand. Compared with traditional fuel or gas heaters, electric garage heaters have the advantages of no exhaust emissions, clean and environmentally friendly, and are more in line with environmental protection requirements. This will prompt more consumers to choose electric garage heaters and
