Abstracts

The global Vaseline market size is predicted to grow from US$ 618 million in 2025 to US$ 804 million in 2031; it is expected to grow at a CAGR of 4.5% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Vaseline ,also called Petroleum jelly, petrolatum, white petrolatum, soft paraffin or multi-hydrocarbon, CAS number 8009-03-8, is a semi-solid mixture of hydrocarbons (with carbon numbers mainly higher than 25), originally promoted as a topical ointment for its healing properties. After petroleum jelly became a medicine chest staple, consumers began to use it for myriad ailments and cosmetic purposes, including toenail fungus, male genital rashes (non-STD), nosebleeds, diaper rash, and chest colds. Its folkloric medicinal value as a 'cure-all' has since been limited by better scientific understanding of appropriate and inappropriate uses. It is recognized by the U.S. Food and Drug Administration (FDA) as an approved over-the-counter (OTC) skin protectant, and remains widely used in cosmetic skin care.

As a result of vaseline's physical and chemical properties, the market for vaseline is growing at an exponential rate. Pharmaceutical and cosmetic products also drive the growth of the vaseline market. North America is likely to hold a significant share of the market due to massive growth in the pharmaceutical andcosmetic manufacturing industries. These industries, in turn, have boosted the demand for this product.Asia Pacific and Europe markets have seen an increased demand for vaseline across industries and cosmeticapplications in recent years.The market for Vaseline in the Asia Pacific is expected to be driven by China, which isthe leading manufacturer of chemical products used across the globe.Europe has made numerous advances in cosmetics products, which are driving the market for vaseline.
