SUMMARY

Residential Construction in Germany industry profile provides top-line qualitative and quantitative summary information including: market size (value 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The residential construction market is defined as the value of work put in place annually for residential buildings. Market value is defined in general as the total output value of construction activity in any given time period, including costs related to construction materials, equipment and services for new construction, refurbishment, repair and maintenance and demolition. All market data and forecasts are represented in nominal terms (i.e. without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2020 annual average exchange rates.

The German residential construction market had total revenues of $215.2bn in 2020, representing a compound annual growth rate (CAGR) of 7.3% between 2016 and 2020.

The repair & maintenance segment was the market's most lucrative in 2020, with total revenues of $81.8bn, equivalent to 38% of the market's overall value.

Globally, the residential construction market has been strongly impacted by the COVID-19 pandemic and many European countries such as the UK and Spain have witnessed a decline in market growth in 2020. Contrarily, Germany has seen moderate growth in the residential construction market over this period and statistics published by Destatis indicate that annual construction turnover was up 4.9% in 2020 compared to 2019.
