The laptop portable monitor connects the notebook with an external data cable, so that the screen content can be put on the portable display, so that the user has a better sense of the screen content and a better operation experience, maybe as a secondary screen of the notebook to help business office or other activities.

Portable monitors provide an acceptable middle ground for unmet needs in situations where individuals may need a new smartphone to stay productive while working or playing computer games. Also known as USB Powered Devices, they are lightweight and stylishly designed to interface with most electronic devices. They work just like normal monitors. Portable monitors come in all shapes and sizes for gamers, movie watchers, and productivity work. Specific features that qualify as portable monitors are monitors that operate from personal, business, and general-purpose models to panels for artists and gamers. Most monitors automatically correct the image so that the image is always placed on the upper right side, whether in landscape or portrait mode. Having two monitors is convenient when it comes to personal or professional work interfaces. When traveling, a portable second monitor acts as a screen room and an extra dimension to our work. The benefit gained is ease of adaptation and relocation. These monitors take up less space and consume less power than standard monitors and mountable locations. The rise of portable displays in the commercial sector is an important aspect driving the growth of the market. Portable monitors play a vital role in

working flexibility. It involves gaming, business use, schooling, watching movies, reading, and more, all through a portable screen. ViewSonic, the world's leading supplier of display solutions, has launched a line of portable monitors to enhance productivity. The TD 1655 and VG1655 monitors can be paired with laptops and tablets so users can be more productive with more screen real estate. This trend is driving the demand for portable monitors in various businesses.
