Microwave steam sterilization bag is a special bag used to sterilize medical instruments and supplies. It contains moisture and heat sensing agent inside, which can be used in microwave sterilization equipment. Through the steam generated by microwave radiation, the equipment and supplies are subjected to high temperature and high pressure moist heat disinfection, which can effectively kill bacteria and viruses and ensure the safety and sterility of medical equipment. Future microwave steam sterilization bags will use higher quality materials to ensure high temperature and high pressure resistance and improve sterilization efficiency and safety.
