The global Mouse Monoclonal Antibody Production Service market size is predicted to grow from US$ 625 million in 2025 to US$ 842 million in 2031; it is expected to grow at a CAGR of 5.1% from 2025 to 2031.

Mouse monoclonal antibody production service is a specialized offering provided by biotech companies or research institutions. It involves a series of complex biological processes where a specific antigen is introduced into a mouse, triggering its immune system to produce antibodies. Splenocytes from the immunized mouse are then fused with myeloma cells to create hybridoma cells. These hybridomas are screened and cloned to isolate those that produce the desired monoclonal antibody, which is highly specific to the target antigen. The service provider then scales up the production of this monoclonal antibody, purifies it to a high degree, and delivers it to clients, who can be researchers for use in experiments, or pharmaceutical companies for drug development and diagnostic applications.

United States market for Mouse Monoclonal Antibody Production Service is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.

China market for Mouse Monoclonal Antibody Production Service is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.
