

Sodium succinate (CAS 150-90-3) Market Research Report 2026

<https://marketpublishers.com/r/SC4D52038E9EN.html>

Date: June 2026

Pages: 50

Price: US\$ 2,200.00 (Single User License)

ID: SC4D52038E9EN

Abstracts

Sodium succinate (CAS 150-90-3) Market Research Report 2026 presents comprehensive data on Sodium succinate markets globally and regionally (Europe, Asia, North America etc.)

The report includes Sodium succinate description, covers its application areas and related patterns. It overviews Sodium succinate market, names Sodium succinate producers and indicates its suppliers.

Besides, the report provides Sodium succinate prices in regional markets.

In addition to the above the report determines Sodium succinate consumers in the market.

BAC Reports offers its clients in-depth market research of chemical industry products on the global and regional markets (North & Latin America, Asia Pacific, European Union, Russia and CIS).

We can analyze the following elements for each chemical product in any country or region:

capacities and production

consumption volume and structure

market price trends

exports and imports

existing technologies

feedstock market condition

market news digest

market forecast.

Sodium succinate (CAS 150-90-3) Market Research Report 2026 can feature:

market condition and estimations, market forecast

chemical product ranges, trademarks, analogous products, application areas

regional and global producers, consumers and traders (including contact details).

Contents

1. SODIUM SUCCINATE (CAS 150-90-3)

- 1.1. General information, synonyms
- 1.2. Composition, chemical structure
- 1.3. Safety information
- 1.4. Hazards identification
- 1.5. Handling and storage
- 1.6. Toxicological & ecological information
- 1.7. Transport information

2. SODIUM SUCCINATE APPLICATIONS

- 2.1. Sodium succinate application spheres, downstream products

3. SODIUM SUCCINATE MANUFACTURING METHODS

4. SODIUM SUCCINATE PATENTS

- Abstract
- Description
- Summary of the invention
- Detailed description of the invention

5. SODIUM SUCCINATE MARKET WORLDWIDE

- 5.1. General Sodium succinate market situation, trends
- 5.2. Manufacturers of Sodium succinate
 - Europe
 - Asia
 - North America
 - Other regions
- 5.3. Sodium succinate suppliers (importers, local distributors)
 - Europe
 - Asia
 - North America
 - Other regions

5.4. Sodium succinate market forecast

6. SODIUM SUCCINATE MARKET PRICES

6.1. Sodium succinate prices in Europe

6.2. Sodium succinate prices in Asia

6.3. Sodium succinate prices in North America

6.4. Sodium succinate prices in other regions

7. SODIUM SUCCINATE END-USE SECTOR

7.1. Sodium succinate market by application sphere

7.2. Sodium succinate downstream markets trends and prospects

*Please note that Sodium succinate (CAS 150-90-3) Market Research Report 2026 is a half ready publication and contents are subject to change. It only requires updating with the help of new data that are constantly retrieved from Publisher's databases and other sources. This updating process takes 5-7 business days after order is placed. Thus, our clients always obtain a revised and updated version of each report. Please also note that we do not charge for such an updating procedure. BAC Reports has information for more than 25,000 different chemicals available but it is impossible to have all reports updated immediately. That is why it takes 5-7 days to update a report after an order is received.

About

Product Name:	Sodium succinate
Synonyms:	Butanedioic acid, disodium salt
	Disodium butanedioate
	Disodium succinate
	Soduxin
	SS 50
	Succinic acid, disodium salt
	Disodium Succinate
	SUCCINIC ACID DISODIUM SALT
	Sodium Succinate Anhydrous Purified Powder
	Sodium Succinat
	Butanedioic acid sodium salt (1:2)
	Succinic acid disodium salt
CAS#:	150-90-3
	6106-21-4
Formula:	$C_4H_4Na_2O_4$
Molecular Weight:	162.05
Appearance:	odorless white powder

Disodium Succinate is a white crystalline powder with the chemical formula $C_4H_4Na_2O_4$. It is readily soluble in water (>100 g/L at $25^\circ C$). The chemical occurs in two forms: the crystal form (hexahydrate) and the anhydrous form (anhydrous).

In Japan, disodium succinate is manufactured as hexahydrate and is widely applied as a seasoning agent or as a feedstock for plating reagent. As a food additive, it is added to sake, soy sauce, ham, wasabi, boiled fish paste and cracker.

In Europe, disodium succinate is not approved as a food additive, but it is registered as a flavoring agent. As a taste enhancer, it is compatible with all types of seasonings and savory flavors. It is used in the preparation of "surimi" foods, sauces, bean paste, vinegar and canned seafood. If used together with monosodium glutamate, disodium succinate deepens and enhances the deliciousness; furthermore, it softens other strong tastes such as acid or salt.

Worldwide disodium succinate is not only known as taste enhancer, but also is used in the manufacture of plating agents, surfactants, biodegradable polymers, bath products and photochemicals.

Most prominent participants of the disodium succinate market include but are not limited to Finetech Industry Limited, Dr. Paul Lohmann GmbH KG, Merck Schuchardt OHG, Atomax Chemicals Co., Ltd., Dr. J. Pharmachem, Spectrum Chemical Mfg. Corp., Jost Chemical Co., Samanta Organics Pvt. Ltd., and AIPU Food Industry Co., Ltd.

The disodium succinate market is covered in the study Disodium Succinate (CAS 150-90-3) Market Research Report 2013. The report encompasses proper description of the product, unveils application areas, and briefly summarizes patents in the sphere. It overlooks disodium succinate market situation, names manufacturers, suppliers as well as users. The report also provides current disodium succinate prices.
