Abstracts

The Indian processed chicken industry has reported a significant growth in recent years, and is presenting ample opportunities to the industry's players. With cold storage infrastructure enhancement and rising awareness about packaged processed chicken products, the Indian processed chicken market is poised to scale newer acmes. Moreover, introduction of frozen snacks, entry of new players, rising investments, evolving government policies and infrastructure projects are set to further boost the market's growth. Growth in disposable income, rising urbanization, government support and schemes have also acted as a catalyst for the processed chicken sector.

The latest research by RNCOS titled, "Indian Processed Chicken Market Outlook 2022" unfolds the market dynamics of the Indian poultry market. The report shows the Indian poultry industry being split into two distinct segments viz.: live chicken and processed chicken, depicting their current and future outlook to 2022. The processed chicken market is further segmented into two sub-segments: frozen chicken products and ready-to-serve chicken products, with each sub-segment scrutinized in detail. The report identifies and highlights the segments that offer maximum opportunity for growth in the Indian processed chicken market.

Our industry analysts studied all the facets of the Indian processed chicken market to portray a crystal clear picture of the current as well as the expected market outlook. Major drivers and trends have been identified that are set to act as catalysts towards boosting the industry's growth, along with roadblocks hindering the market's growth. Also, the highest chicken producing and consuming states have been identified to focus on the area of opportunities for new players.

The report further highlights the competitive landscape of the Indian processed chicken market, describing the business, strengths and weaknesses of the major industry players. The section is therefore expected to clearly help the reader gain crucial insight
