Abstracts

SHORT DESCRIPTION

This report presents a strategic analysis of the African baby foods market and a forecast for its development in the medium term. It provides a comprehensive overview of the market volume and value, dynamics, segmentation, characteristics, main players, prices, international trade, trends and insights, growth and demand drivers, challenges, etc. This is the most detailed and comprehensive report about the African baby foods market, covering all African countries (39 single countries). The report presents information on each indicator for each of the 39 countries covered, offering unmatched value, accuracy and expert insights.

REPORT PURPOSE

The purpose of the report is to describe the state of the African baby foods market and to present real and expert-verified information about the volumes, values, dynamics, segmentation and characteristics of consumption, prices, imports, and exports. The report also presents a forecast for the market development in the medium term. In addition, the report presents an elaborate analysis of the main market participants, industry trends and insights, growth and demand drivers and challenges and all other factors, influencing the market development.
Questions This Report Answers
The report on the African baby foods market covers:

Market volume, value and dynamics for the last five years;

Market segmentation (by each covered country; by product groups, etc.) for the last five years;

Analysis of the factors, influencing the market development (market trends and insights, drivers and challenges);

Value chain analysis and structure of price formation;

Analysis of retail price levels and their dynamics for the last five years (broken down by each covered country);

Analysis of the major international trade flows;

Volume, value, dynamics, segmentation (by each covered country) and analysis of imports for the last five years;

Volume, value, dynamics, segmentation (by each covered country) and analysis of exports for the last five years;

Volume and dynamics of the average import and export prices for the last five years (broken down by each covered country);

Volume, value, dynamics, segmentation and analysis of per capita consumption for the last five years (broken down by each covered country);

Forecast for market development in the medium term (volume, value and segmentation by each covered country);

Characteristics of the main players on the market;

Analysis of the competitive landscape;

Importance of the HoReCa channel (on-trade vs. off-trade consumption);

Market shares of the main market players for the whole region;

Distribution channels for retail sales;

Five Forces analysis;

Analysis and forecast for the global economy and demographics.

How Can You Benefit from This Report?
With the help of this report you can:

Discover reliable and expert-verified market data, with which you can confidently make smarter business decisions and drive your business forward;

Track market data, including volume, value, segmentation, forecasts, dynamics and structure – past, present and future;

Quickly and cost–effectively own a strategic analysis and gain competitive intelligence about the market;

Track and identify key market trends and insights and key drivers behind recent market changes;

Strategically assess growth potential, opportunities, demand drivers and challenges on the market;

Own and compare information at both aggregate level (regionally) and for each individual country, covered in the report;

Discover the top-performing markets (strongest and weakest performers) as well as the markets, that are forecast to grow the most in the medium term (rising stars vs. yesterday's news);

Strategically assess the importance of the HoReCa channel on the market;

Discover the importance of each distribution channel for the retail market;

Build and execute upon a strong strategy based on verified market data and expert insights;

Explore and identify new market opportunities in the countries within the market;

Discover how each of the markets performed in the past (in the last 5 years) and

how it will perform in the future (in the next 6 years);

Strategically assess the competitive position of the main market players and their respective market shares;

Evaluate how diversified the market is in terms of competitive intensity, fragmentation and environment and understand competitive threats;

Make important strategic decisions safely and with confidence;

Discover data your competitors might already have and be acting upon;

Evaluate your position on the market, choose a new market to enter or get to know a completely new market;

Receive professional expertise on the market and everything important, connected with its development;

Save your time and resources by not having to compile the whole research by yourself;

Save money by not having to invest in 39 country reports separately;

Get all the data you need in one place and in less than 24 hours;

Empower your marketing, branding, strategy, product and business development, consumption and supply functions with valuable market insights;

Build your investment strategy by assessing market attractiveness, country attractiveness or company attractiveness;

Build your own market entry or market expansion strategy or evaluate your current strategy;

Add value to pitches and presentations by using verified market data and expert insights;

Evaluate the key macroeconomic indicators to get insight into the general trends within the economy and demographics.

What Kind of Data Is Presented in This Report?
This report presents data, which is:

Reliable (the report is prepared using a proven methodology, including both primary and secondary research);

Expert-verified (the data is cross-checked and confirmed by more than 30 local experts, representatives of the main market players);

Real (allowing you to confidently make smarter business and strategic decisions);

Comprehensive (breaks down the overall African data into separate data for 39 countries);

Comparable (the report covers information, which has been calculated in the same units for each indicator, making it comparable among all African countries but still taking into account the local differences of the markets);

Easy to read, perceive and understand (you do not have to be a market expert to understand what really is happening on the market and how it works);

Valuable (the value you get from this report is much higher than the investment you make for it);

Quick and hassle-free to get (you can be reading this report in less than 24 hours);

Commercially feasible - you do not have to invest in 39 country reports separately;

All in one place;

Easy to get - just a few clicks away!

What Kind of Decisions You Can Make Based on the Data in This Report?
This report presents reliable and real market data, providing valuable support to make important strategic decisions regarding:

- Strategic planning;
- Marketing and sales;
- Market and industry evaluation;
- Evaluation of market opportunities, risks and challenges;
- Regional and country evaluation and opportunity analysis;
- Market entry;
- Market growth;
- Pricing and promotion;
- New product development;
- Distribution;
- Sourcing and supply chain management;
- Company evaluation;
- Mergers and acquisitions.

Who Is This Report for?
This report is for people who already are actively working on this market, representatives of producers, distributors, importers, exporters, wholesalers, retailers, suppliers:

- Industry C Level executives;
- Directors;

Industry strategists;

Marketing professionals;

Business development professionals;

Product developers;

Product marketers and strategists;

Product managers;

Project managers;

Suppliers;

Traders;

This report is also for people, not directly or actively involved in the market, representatives of investors, consultants, advisors and financial institutions:

Management consultants;

Investment managers;

Financial professionals;

Bank managers;

M&A managers.

SHORT METHODOLOGY

This research report has been prepared using the proven WMStrategy's methodology, including a blend of qualitative and quantitative data. The information comes from official sources and insights from market experts (representatives of the main market

participants), gathered by semi-structured interviews. For this particular report, more than 30 market expert interviews have been conducted with experts from the leading market companies (producers, distributors, retailers, suppliers, etc.). The full list of interviewed experts and a detailed methodology are available upon request.

REGIONAL COVERAGE

The report on the African baby foods market breaks down the region into the following countries and covers every single one of them:

Africa:

- Algeria;
- Angola;
- Benin;
- Botswana;
- Burkina Faso;
- Burundi;
- Cameroon;
- Chad;
- Republic of the Congo;
- Egypt;
- Equatorial Guinea;
- Ethiopia;
- Gabon;
- Gambia;

Ghana;

Guinea;

Ivory Coast;

Kenya;

Lesotho;

Madagascar;

Malawi;

Mauritius;

Morocco;

Mozambique;

Namibia;

Niger;

Nigeria;

Rwanda;

Senegal;

Seychelles;

Sierra Leone;

South Africa;

Sudan;

Tanzania;

Togo;

Tunisia;

Uganda;

Zambia;

Zimbabwe.

PRODUCT COVERAGE

This report covers the following product groups:

Roast coffee (including coffee pads and pods (single-serve coffee), ground coffee beans and whole coffee beans; excluding instant coffee and ready-to-drink coffee (RTD coffee).

RECAP

This is the most valuable, detailed and comprehensive report about the African baby foods market currently available, covering 39 single countries! We also offer similar reports, covering every global country and region separately and offer special terms for bundle purchases. So, if you are interested in the African baby foods market, this research report will provide you with reliable, expert-verified and real market data you can safely and confidently base your decisions on. In a quick and hassle-free way, it will provide you with a strategic analysis of the market, its recent and future development. In addition, this solution will save you time and money while presenting you all the necessary information, empowering you to make informed commercial decisions and move your business forward!
This report is the most in-depth publicly available business analysis that exists on this particular market. And it is all here in one place, just a few clicks away!

REPORT CUSTOMIZATION

If the report as is does not work for you, you can get it customized, according to your own specific requirements and criteria. Feel free to contact us for more information!

EXECUTIVE SUMMARY

The baby foods market in Africa was equal to 4.32 billion USD (calculated in retail prices) in 2014. Until 2024, the baby foods market in Africa is forecast to reach 12.98 billion USD (in retail prices), thus increasing at a CAGR of 9.50% per annum for the period 2019-2024. This is a decrease, compared to the growth of about 13.67% per year, registered in 2014-2018.

The average consumption per capita in value terms reached 4.93 USD per capita (in retail prices) in 2014. In the next five years, it grew at a CAGR of 6.75% per annum.

In the medium term (by 2024), the indicator is forecast to slow down its growth and increase at a CAGR of 4.50% per annum.

Parents are increasingly concerned about the food impact on their child's health. Therefore, one of the most important baby food purchase criteria includes the positive health benefits associated with a certain product. In particular, demand for products with added probiotics and prebiotics has been high, due to their ability to promote a child's digestive system. Meanwhile, customers are also avoiding added, artificial and synthetic ingredients in baby food, which is resonating with the ongoing clean label movement. This is also valid for added sugar, which is another important health aspect, which even matters more than flavor for many parents.
Another notable trend in the baby foods market is linked with the growing popularity of high-pressure processing (HPP), which is quick and allows maximum health benefits. The high-pressure process provides fresh and healthy food products, which are pressurized to kill harmful bacteria without using heat and depleting nutrients. In line with this trend, large retailers have started to include more HPP baby food alternatives to their shelves.
The baby foods market nowadays offers a wide range of highly nutritious products, fulfilling the needs of newborns and young children. Despite this, the growing awareness of the health properties of breastfeeding rises across the world, which leads to fewer people relying on baby food and infant formulas. At the same time, parents, especially the younger ones, are interested in organic formula products and are willing to pay more for premium options.
