Photovoltaic Solar Panel Market Shares Strategies, and Forecasts, Worldwide, 2010 to 2016

WinterGreen Research

Date: Mar, 2010

Pages: 700

Price: US\$ 3,500.00

ID: P13C9267B30EN

WinterGreen Research announces that it has a new study on Photovoltaic Solar Strategies, Technologies And Opportunities: Market Shares and Forecasts, Worldwide, 2010?2016. The 2010 study has 700 pages, 306 tables and figures.

Large solar farms are more popular initially, but solar is anticipated to be built out on commercial roof tops in increased quantity. The electricity generated will be fed to local substations and distributed to homes from there. The electricity generated will be used for both stationary power and to charge electric vehicles. Photovoltaics PV market growth depends on volume production to achieve economies of scale.

Solar energy market driving forces relate to the opportunity to harness a cheap, long lasting, powerful energy source. Solar energy can be used to create electricity in huge quantity. Solar panels are mounted in a weatherproof frame, are mounted in areas with direct exposure to the sun to generate electricity from sunlight.

Solar power systems are comprised of solar modules, related power electronics, and other components. Solar panels are used in residential, commercial and industrial applications. Solar compositions of arrays that comprise electric utility grids appear to be the wave of the future.

The demand for solar energy is dependent on a lower prices for solar and higher prices for petroleum. A combination of economies of scale being realized in the manufacturing along with increases in the current prices for petroleum will drive solar energy adoption.

The overall solar market has attained enough critical mass to boost competitive technologies of thin film and monocrystalline, polycrystalline, and multicrystalline silicon based systems.

First Solar, the market leader, in commercial systems is participating in the solar markets at a level of \$1.9 billion of a total 2009 market of \$19.6 billion for 2009. First Solar is well positioned to gain significant market share over the next five years. First Solar basically does monolithic integration on glass, making things on the module level.

First Solar PV modules are thin film PV modules. The achievement of reaching 1GW of modules in installations bodes well for the entire industry, bringing credibility to the solar energy effort. To support the growing demand, First Solar continues to push the limits on volume manufacturing. First Solar is integrating each production step.

Sharp, the market leader, has achieved remarkable penetration of residential markets. Mass production of tandem?type thin?film solar cells means two types of cells are offered—crystalline types suitable for colder temperatures at high latitudes, and thinfilm types better suited to warmer regions. Sharp is a unique manufacturer in that they offer both types.

Key market transitions are being made relative to smart grid, the increasing centrality of the local power substation, and implementation of the smart grid as a distribution center for electricity generated by solar power.

Solar energy is being adopted because the petroleum reserves are facing depletion. Solar offers plentiful, cheap energy source with panels that have a 25 year life and payback within 10 years. The payback is within 8 months if the solar electricity generated is used to charge an electric vehicle.

Thin film batteries and new utility level electricity storage are evolving. Thin film batteries are expected to power electric vehicles and sit on the ground outside homes and apartment buildings to store the electricity generated by solar. Thin film batteries provide the bridge to offer electricity when the sun is not shining.

Thin film batteries fuel growth in solar markets. These markets are set to evolve even faster than anyone has thought. Sharp, First Solar, Trina Solar, Suntech, and Ascent Solar Technologies are among the companies anticipated to benefit from the build out of solar energy. These are the companies positioned to leverage solar energy market growth. These market participants continue to be very aggressive in both internal innovation commitments, as well as partnership and acquisition strategies.

According to Susan Eustis, President of WinterGreen Research, "Worldwide solar markets are poised to achieve significant growth as solar energy is widely adopted, creating economies of scale and funding new technology efficiencies. Manufacturing efficiencies are expected to create new uses and permit users to leverage existing ones. Costs of solar panels are expected to decrease rapidly in response to the continuing economies of scale. Market strategies of the leaders Sharp First Solar, and Trina are compelling in their innovation and flexibility"

Emerging markets depend on 100 successful trials and reference accounts. Solar energy has now surpassed that magic number and is poised for rapid growth. The reference accounts are in place, the prices of the solar modules are decreasing at a faster pace than the industry had predicted, grid parity has been achieved in some places and is on track to be achieved everywhere.

Investment in solar energy is anticipated to continue. Participants will come and go, industry consolidation and high growth patterns will alternate until the nascent industry stabilizes, but solar energy is here to stay.

Solar energy is in place. It works, it is no longer a dream or a long shot, it is real. Read the study, look at the pictures of the large number of installations, this is an amazing market, emerging long after early efforts to bring these technologies to reality: Why is it here now? Solar energy is evolving because the price of gasoline is going to continue to climb.

Solar energy markets are big. At \$19.6 billion in 2009 solar panels are anticipated to reach \$125.5 billion by 2016. Market growth comes because the technology has caught the imagination of everyone, consumers, vendors, governments, politicians, oil producers, and the utility industry. The technology works, its benefits have a positive ROI over the useful life of the panels, even a significant payback. Solar provides the cheap, clean, dependable energy source needed to drive industrial growth, available.

Table of Content

PHOTOVOLTAIC SOLAR EXECUTIVE SUMMARY

- Solar Technology Executive Summary
- Solar Energy Market Driving Forces
- Solar Energy Market Shares
- Photovoltaic Solar Energy Market Forecasts
 - Solar Industry Outlook
 - 100 Successful Trials And Reference Accounts
 - Solar Utility Market Driving Forces
- Commercial Solar

PHOTOVOLTAIC SOLAR MARKET DESCRIPTION AND MARKET DYNAMICS

1. Solar Technology Market Description and Market Dynamics

1.1 Solar Technologies

- 1.1.1 Research Initiatives
- 1.1.2 Thin Film Material Layers

1.2 Photovoltaic Conversion Of Sun Light

- 1.2.1 Solar Panel Orientation

1.3 Thin Film Solar Materials

1.4 Sunlight Intensity in Various Regions

- 1.4.1 Sunshine Index
- 1.4.2 Economics of PV

1.5 Variety of Solar Panel Installations

- 1.5.1 Off-Grid Systems:

1.6 Solar Technology

- 1.6.1 Cost-Competitive Solar
- 1.6.2 Crystalline-Silicon Panels
- 1.6.3 Thin-Film Solar
- 1.6.4 Silicon or CIGS

1.7 World's Largest PV Installation German Solar

1.8 The Basics of Solar Electricity

1.9 Utility Power Positioning

- 1.9.1 Utility Solar Decision Making

1.10 U.S. Building Construction Industry

1.11 Silicon Panels Harvest More Energy

- 1.11.1 Solar Real Estate

1.12 Smart Electric Grid Overhaul: Utility

- 1.12.1 IBM Smart Grid
- 1.12.2 U.S. Electric Grid Needs Major Overhaul: Utility
- 1.12.3 Flexible Solar Cells With Silicon Wires

1.13 Competition and Advanced PV Technologies

1.14 Parts Of The Solar Cell Manufacturing Process

- 1.14.1 Silicon Crystal Growing or Casting Plants
- 1.14.2 Solar Cell Plants
- 1.14.3 Module Assembly Plants
- 1.14.4 Systems Assembly

1.15 Greenhouse Gases

1.16 Productionizing Technologies

1.17 Era Of Cheap Energy

- 1.17.1 Unprecedented Level Of Development Worldwide
- 1.17.2 Population Increases

1.18 Tackling Climate Change

1.19 Power From the Sun

- 1.19.1 PV Industry
- 1.19.2 SGS Solar Services

PHOTOVOLTAIC SOLAR MARKET SHARES AND MARKET FORECASTS

2. SOLAR TECHNOLOGY MARKET SHARES AND FORECASTS

2.1 Solar Energy Market Driving Forces

2.2 Solar Energy Market Shares

- 2.2.1 First Solar Thin Film Monolithic Integration On Glass
- 2.2.2 Sharp Solar Cells
- 2.2.3 Sharp Increasing The Size Of The Output To Maintain Leading Market Share
- 2.2.4 Trina Solar Limited Square Monocrystalline Cell

- 2.2.5 SolarWorld Residential
- 2.2.6 Suntech Solar Cells
- 2.2.7 Canadian Solar
- 2.2.8 BP Solar Core Markets Monocrystalline And Multicrystalline Cells
- 2.2.9 LDK
- 2.2.10 Yingli
- 2.2.11 CIGS
- 2.2.12 Q-Cells CIGS Module Positioning
- 2.2.13 Ascent Solar Semiconductor Deposition
- 2.2.14 NanoSolar and MiaSole Thin Film Technology
- 2.2.15 Ascent Solar Thin Film Photovoltaic Devices CIGS (Copper Indium Gallium Selenide).
- 2.2.16 Shenzhen Sunshine Electronics Manufacturing Solar Lighting
- 2.3 Photovoltaic Solar Energy Market Forecasts
 - 2.3.1 Solar Industry Outlook
 - 2.3.2 100 Successful Trials And Reference Accounts
 - 2.3.3 Solar Utility Market Driving Forces
 - 2.3.4 Grid Parity
- 2.4 Multiple, Large, Working Solar Energy Installations
- 2.5 Commercial Solar
 - 2.5.1 Residential Solar
 - 2.5.2 Government, Enterprise, and Capital Market Funding of Solar Energy Initiatives
 - 2.5.3 President Obama's Energy Plan
 - 2.5.4 Crystalline Modules vs. Thin Film Solar
 - 2.5.5 Monocrystalline Modules
 - 2.5.6 CdTe Thin Film Technology
 - 2.5.7 CIGS Thin Film Technology Photovoltaic Effect
 - 2.5.8 CIGS On Glass
 - 2.5.9 Thin Film Vs. Monocrystalline or Polycrystalline
 - 2.5.10 Solar Market Transitions
 - 2.5.11 Solar Energy Conversion Efficiency
 - 2.5.12 Solar Energy Megawatts Shipped
 - 2.5.13 Solar Energy Cost per Watt
 - 2.5.14 Solar Manufacturing Capacity
 - 2.5.15 Shenzhen Sunshine Electronics Manufacturing Capacity
 - 2.5.16 Solarfun 2010 Capacity Expansion
 - 2.5.17 Solar Manufacturing Run Rate
 - 2.5.18 Solar Module Conversion Efficiency
- 2.6 PV Technology, Production and Cost, 2009 Forecast Photovoltaic Solar Product Description

3. SOLAR PRODUCT DESCRIPTION

- 3.1 Commercial Solar
- 3.2 First Solar Commercial Systems
 - 3.2.1 First Solar Positioning
 - 3.2.2 First Solar Energy High Performance. High Volume
 - 3.2.3 First Solar Commercial-Scale Solutions
 - 3.2.4 First Solar Largest Solar Power Plant Built In China by Americans
- 3.3 Trina Solar
- 3.4 Energy From Trina Solar Modules
 - 3.4.1 Trina Solar Monocrystalline Modules
 - 3.4.2 Trina Solar TSM-PC05, 215W to 235W Multicrystalline Module
- 3.5 Q Cells
 - 3.5.1 Q-Cells CIGS Modules
 - 3.5.2 Q Cells Cdte Solar Modules
- 3.6 Sharp

- 3.6.1 Sharp Solar Cell With The Highest Efficiency Of Conversion In The World
- 3.6.2 Sharp Mass Production Of Solar Cells
- 3.7 Mia Sole
 - 3.7.1 Mia Sole Thin Film CIGS Solar
 - 3.7.2 MiaSolé's CIGS Solar Cell
 - 3.7.3 Miasolé CIGS-Based Thin Film Solar Panel Manufacturing
- 3.8 Nanosolar
 - 3.8.1 Nanosolar Commercial Production
- 3.9 Palios Flexible Glass
- 3.10 BYD**
 - 3.10.1 China BYD to invest \$3.3 billion in solar battery plant
- 3.11 Armageddon Energy
- 3.12 United Solar Ovonic
- 3.13 NuvoSun
 - 3.13.1 Dow Chemical / NuvoSun
- 3.14 Kyocera
- 3.15 SunWize Technologies
- 3.16 Sanyo
 - 3.16.1 Sanyo Hit Solar Panels
- 3.17 REC**
- 3.18 Canadian Solar
- 3.19 GE Solar Panel
- 3.20 BP Solar
 - 3.20.1 British Petroleum BP Solar Panels
- 3.21 SolarWorld
- 3.22 Suntech
 - 3.22.1 Suntech HiPerforma™ Modules
 - 3.22.2 Suntech Solar Cells
- 3.23 Uni-Solar
- 3.24 HelioVolt
- 3.25 Ascent Solar
- 3.26 Ascent Solar
- 3.27 Solarion Process
- 3.28 Global Solar
- 3.29 JA Solar
- 3.30 Suniva Solar Cells Set For Aerotropolis Atlanta
 - 3.30.1 Suniva
 - 3.30.2 Suniva® Intersection Of High Efficiency And Low Cost
 - 3.30.3 Suniva Collaborating in Solar
 - 3.30.4 Suniva Product Offerings:
 - 3.30.5 Suniva Intersection of High Efficiency and Low Cost
- 3.31 Utility-Scale Solar Solutions
- 3.32 First Solar Utility-Scale Solutions
- 3.33 Trina Solar Utility
- 3.34 Kyocera Solar Utility
- 3.35 Sharp Utility Solar Installation
 - 3.35.1 Sharp Utility-Scale Products
- 3.36 Scatec Solar
 - 3.36.1 Scatec Solar Utility Project Development Phase
- 3.37 Residential Solar
- 3.38 Sharp Residential
 - 3.38.1 Sharp OnEnergy™ Roof-Mounted Solar Electric Systems
 - 3.38.2 Sharp High-Power Monocrystalline Residential Solar Modules
- 3.39 First Solar U.S. Residential and Small Commercial Solutions
- 3.40 SolarCity

- 3.41 Scatec Solar Residential
- 3.42 Solar Energy Initiatives
- 3.43 SolarWorld Residential
- 3.44 Consumer Solar
- 3.45 G24 Innovations
 - 3.45.1 G24 The Solar Power Lamp
- 3.46 Smart Grid
- 3.47 Petra Solar Pole Based Solar Collectors

PHOTOVOLTAIC SOLAR TECHNOLOGY

4. SOLAR STRATEGY, TECHNOLOGY, AND INDUSTRY SPECIFIC APPLICATIONS

- 4.1 Solar Panel Technologies
 - 4.1.1 Thin Film Solar Cells Amorphous Silicon
 - 4.1.2 Thin Film Solar Cells Cadmium Telluride
 - 4.1.3 Thin Film Solar Cells CIGS (Copper Indium Gallium Selenide)
 - 4.1.4 Miasolé Copper-Indium-Gallium-Diselenide Films Conversion Efficiency Confirmation From NREL
 - 4.1.5 Thin-Film On Glass Substrate
 - 4.1.6 Ascent Solar Putting CIGS On A Polymeric Or Plastic Substrate
 - 4.1.7 First Solar Monolithic Integration On Glass
 - 4.1.8 Substrate Discussion
 - 4.1.9 First Solar Modules Cadmium Telluride (CdTe) Semiconductor Material
- 4.2 Trina Solar Silicon Panels
- 4.3 Q Cells Technology
- 4.4 SunTech
- 4.5 CIGS Photovoltaic Effect
 - 4.5.1 Crystalline Silicon Indirect Band-Gap Semiconductor
 - 4.5.2 Solar Thin Film Substrates
 - 4.5.3 Gettering in Large-Grained Thin Polycrystalline Silicon Films on Glass Substrate
 - 4.5.4 EPV Solar Contracts Deliver 300 Megawatts Of Thin-Film Panels Through 2012.
 - 4.5.5 Nanosolar
 - 4.5.6 HelioVolt
 - 4.5.7 First Solar
 - 4.5.8 Photovoltaic Technologies: Single Crystal, Polycrystalline and Thin Film
 - 4.5.9 Single Crystal and Polycrystalline
 - 4.5.10 Thin Film Panels
- 4.6 Shading
- 4.7 Third-Generation Thin-Film Solar Applications
- 4.8 Flexible Glass Solar Panels
- 4.9 Polysilicon Producers
 - 4.9.1 Emerging Global Solar Polysilicon Producers
- 4.10 Inverter and Micro Inverter Markets

PHOTOVOLTAIC SOLAR COMPANY PROFILES

5. SOLAR COMPANY PROFILES

- 5.1 Selected Solar Companies
- 5.2 A-Power
- 5.3 Abengoa Solar
- 5.4 Anwell Technologies
- 5.5 Areva / Ausra
 - 5.5.1 Areva New Strategy
- 5.6 Ascent Solar Technologies

5.6.1 Ascent Solar Technologies Completed Construction Of A 1.5 MW Production Line

5.7 BP

- 5.7.1 BP brands
- 5.7.2 BP Solar Revenue
- 5.7.3 BP Solar
- 5.7.4 TATA BP Solar

5.8 BYD

- 5.9 China Sunergy
- 5.10 Canadian Solar
- 5.11 China Guangdong Nuclear Wind Power Company
- 5.12 Conergy AG -
 - 5.12.1 Conergy Solar System Integration
 - 5.12.2 Conergy Sale of Solar Water Pump Division to Innovative Solar Solutions
 - 5.12.3 Conergy and MEMC Agreement
- 5.13 Corning
 - 5.13.1 Corning A Growth Company
 - 5.13.2 Corning Worldwide LCD TV
 - 5.13.3 Other Corning Businesses
 - 5.13.4 Corning 2010 Market Strength
 - 5.13.5 Corning Specialty Materials Segment Gorilla Scratch-Resistant Cover Glass
 - 5.13.6 Corning Fourth-Quarter Revenue
- 5.14 Developers Diversified Realty (DDR)
- 5.15 Daqo New Energy
- 5.16 Dow Chemical
 - 5.16.1 Dow Chemical / NuvoSun
- 5.17 Dyesol
- 5.18 Energy Conversion Devices / United Solar Ovonic
 - 5.18.1 Energy Conversion Devices Revenues
 - 5.18.2 Energy Conversion Devices 1.87 Megawatt Uni-Solar Installation on Flanders Expo Hall in Belgium
 - 5.18.3 Energy Conversion Devices Integrated And Commercial Rooftop Photovoltaics
- 5.19 ET Solar
 - 5.19.1 ET Solar Vertically Integrated Solar Energy
 - 5.19.2 ET Solar / USE:
- 5.20 Evergreen Solar
 - 5.20.1 Evergreen Solar's Quarterly Loss Widens
 - 5.20.2 Evergreen Solar String Ribbon™ Solar Panels
- 5.21 First Solar
 - 5.21.1 First Solar Comprehensive Photovoltaic (PV) System Solutions
 - 5.21.2 PNM Electric Utility, First Solar Contract for 22 Megawatts of Utility Scale Solar Power for New Mexico
 - 5.21.3 First Solar Competitive Positioning in Thin Film
 - 5.21.4 First Solar Revenue
 - 5.21.5 First Solar Partners
 - 5.21.6 First Solar Strategy
- 5.22 G24
 - 5.22.1 G24I Dye Sensitized Solar Cell Technology Platform
- 5.23 GreenWing
- 5.24 HelioVolt
- 5.25 Hoku Scientific
 - 5.25.1 Hoku Scientific
- 5.26 Honda
 - 5.26.1 Honda Solar Power
 - 5.26.2 Honda Soltec
- 5.27 JinkoSolar
- 5.28 Juwi

- 5.29 Kyocera
 - 5.29.1 Kyocera Solar
 - 5.29.2 Kyocera Supplies. 40 MW at Large-Scale Solar Power Plants in Spain
- 5.30 LDK Solar
 - 5.30.1 LDK Solar Revenue
 - 5.30.2 LDK Solar and Q-Cells Continuation of Supply Contract
- 5.31 Masdar PV
 - 5.31.1 Masdar PV Si thin film module 1,4m²
- 5.32 MEMC**
 - 5.32.1 MEMC Electronic Materials / SunEdison
 - 5.32.2 MEMC / SunEdison and Developers Diversified Realty National Rooftop Solar Program.
 - 5.32.3 MEMC / SunEdison's REIT Solar Program Power Hosting
- 5.33 MiaSolé
 - 5.33.1 Miasolé Technology Problems Fixed:
 - 5.33.2 Miasolé Financing & Underwriting
 - 5.33.3 MiaSolé Commercial Shipments to Multiple Customers
- 5.34 Mitsubishi Solar Panels
- 5.35 Oerlikon Solar
 - 5.35.1 Oerlikon Coating
 - 5.35.2 Oerlikon Coating Business Units / Market Areas / Applications
- 5.36 Petra Solar
- 5.37 PNM**
- 5.38 Q Cells
 - 5.38.1 Q-Cells Revenue Development
- 5.39 Ranking Solar
- 5.40 Samsung
- 5.41 Sanyo
- 5.42 Scatec Solar
 - 5.42.1 Scatec Solar Engaging In Rural Electrification In Emerging Markets
- 5.43 Schott
 - 5.43.1 Schott Business
- 5.44 Sharp
 - 5.44.1 Sharp LCD
 - 5.44.2 Sharp Solar Cell Plant
 - 5.44.3 Sharp Thin-Film Solar Cell Facilities
 - 5.44.4 Sharp Revenue
- 5.45 Shell Oil
- 5.46 Solar Energy Initiatives
- 5.47 Shenzhen Sunshine Electronics
- 5.48 Singulus Technologies
- 5.49 SMA Solar Technology AG
- 5.50 SMA Solar
- 5.51 Solyndra
 - 5.51.1 Solyndra: 1.9 MW Project Installed
- 5.52 Staples (SPLS)
- 5.53 Solarfun
 - 5.53.1 Solarfun Third Quarter 2009 Revenue
 - 5.53.2 Solarfun Revenue First Quarter 2009
 - 5.53.3 Solarfun PV Module Contracts Total 12.65 MW in China
 - 5.53.4 Solarfun 2010 Capacity Expansion
 - 5.53.5 Solarfun to Build 100MW Solar Power Plant in Jiayuguan City, Gansu Province
- 5.54 Solar Fusion Power
- 5.55 SolarWorld

I would like to order:

Product name: Photovoltaic Solar Panel Market Shares Strategies, and Forecasts, Worldwide, 2010 to 2016
Product link: <http://marketpublishers.com/r/P13C9267B30EN.html>
Product ID: P13C9267B30EN
Price: US\$ 3,500.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service: office@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click 'BUY NOW' button on product page <http://marketpublishers.com/r/P13C9267B30EN.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:
