Abstracts

The comprehensive LNG report provides complete data and analysis of global LNG industry. Countries, companies and terminals information is provided in detail. All regasification and liquefaction markets are analyzed in detail. Investment opportunities and capital investment forecasts in each country are provided. The report also analyzes business strategies, operations, market structures of LNG markets along with information on operators, owners, investment companies, constructors and associated entities. Annual Natural gas reserves, production demand forecasts along with LNG supply and demand outlook to 2020 are provided. Impact of FLNG, small/mid scale LNG and complete details of the terminals are provided in the report. Annual LNG trade movements, prices and sale purchase agreements are provided in the report. Competitive Landscape and detailed SWOT, Financial profiles of five leading LNG companies are provided in the report.

Scope

This user friendly research work analyses the world LNG export market in four levels- global level, regional level, country level and terminal level.

The report provides an outlook of industry, installed and storage capacities, tank and train details, sales and purchase agreements to 2025 along with historical data from 2000

Global and regional information on natural gas reserves, production and consumption patterns along with major producing fields, their operators and reserves are provided

The rational of the country to venture into LNG business and the potential benefits of LNG business for the country's economy are detailed

Illustrative maps of all the existing and planned LNG terminals in each country is provided

Each country is benchmarked against five peer markets on four indexes including supply index, capacity index, economic index and operational index

Positioning map is provided for all regional markets, which categorizes the market into one of the growth life cycle stages (potential, competitive, growth and saturated stages) and provides insights into the potential strategies required to prevail in the market

Market structure of the industry includes all the players in the industry and their market shares from 2000 to 2020

Complete construction details including FEED/ EPC contract, constructor details, construction period and operating technology are provided for each of the existing and planned LNG terminal in the country

All active and announced Sales and Purchase agreements (SPA) (long term export or import contracts) are provided along with purchaser, quantity and duration details

Trade movements and pricing information by country are provided for a period of six years from 2000 to 2010

In the terminal analysis section, start year, installed (send- out or processing or liquefaction/regasification) capacity, number of processing trains, storage capacity and number of tanks are provided.

Operator and shareholders along with their equity in the terminal are also provided for all terminals

Capital investment of existing and planned terminals, feasibility of planned terminals is also provided

Source field supplying feed gas to the terminal, connecting pipelines from field to terminal, jetty and other infrastructure, LNG carriers that export or import LNG are provided for each terminal

Company profiles of five major companies operating in the country's LNG market are provided

Latest mergers, acquisitions, contract announcements, trade agreements, terminal expansions and all other news compiled from company websites, news articles, journals and government organizations are provided

Reasons To Purchase

Make strategic decisions using our in-depth analysis and historical and forecasted data on terminals, countries and companies

Identify potential opportunities for gas procurement, capacity reservations and asset investments

Evaluate pros and cons of investing in the country's LNG market as compared to its peer markets

Enhance your strategy formulation through our positioning matrix and identifying the growth stage of the market

Identify potential investment opportunities present across the LNG value chain in the entire world

Evaluate planned projects using our feasibility analysis of planned projects and capital investment

Gain access to data on LNG pricing and trade movements in different parts of the world and export or import LNG from stable and cheapest sources

Stay ahead of competition by understanding their business strategies and planned investments

Make merger and acquisition decisions using market share information and
