Executive Summary

Over the past few years, globally, there has been huge demand for analytical instruments and automation products. The industry has been witnessing strong growth and leading players have experienced growth in revenues. There have been major investments in the sector particularly in areas of acquiring products and entering into new markets.

The report 'Emerging Opportunities in the Global Analytical Instruments Market' highlights key drivers of and trends emerging in the analytical instruments space globally. Initiatives of leading players such as GE Analytical Instruments, Thermo fisher Scientific and Agilent Technologies have been examined. The rising demand along with emerging opportunity areas globally provides a strong rationale for analysing the industry. The current market scenario and future prospects of the emerging technology area process analytical technology (PAT) has also been examined. Since the advent of the economic downturn a few years back, most of the end-user segments commenced advocating the requirement to enhance process output and competence by reducing delays in reporting. In such a scenario PAT has gained tremendous attention of the industry.

Why should the report be purchased?

The objective of this report is to understand the overall analytical instrument industry dynamics and identify the opportunities existing in the market. The content in the report is useful for companies and investors both looking to enter or already existing in the market. Further, the report also highlights strategies adopted by various companies

which will be helpful for new entrants as well as existing players.
