360iResearch predicts the global digital asset management market to grow from USD 1,714.15 million in 2016 to USD 7,230.48 million by 2023, at a Compound Annual Growth Rate (CAGR) of 22.83%. The year 2016 has been considered as the base year, while the forecast period is up-to 2023.

The major forces driving the growth of the digital asset management market include the digital transformation among enterprises and emerging IoT and proliferation of cloud technology and big data. Moreover, marketers embracing the digital asset management to improve marketing efficiency and automate workflow by providing archival, backup and tracking of digital files are also some of the factors that are driving the market growth. However certain factors such as the close substitute products/intense competitors may hinder the market growth. In the middle of difficulty lies opportunity such as the slow shift from traditional approaches, demand for mobile workforce and SaaS, and incorporating machine learning capability & AI for easy management and sort the data. The possible challenges for the market growth are sheer volume of digital content, and content management challenge. But key players in the market are overcoming the challenges with continual improvement and innovation.
