Europe Energy Storage Systems Market (2017–2023):Market Forecast By Technology (Electro-Chemical Energy, Mechanical Energy, Thermal (Molten Salt) and Others), Applications (Residential, Power Utilities, Commercial & Industrial and Transportation) and Countries (Germany, France, Spain, United Kingdom, Italy and Rest of Europe)

According to 6Wresearch, Europe Energy Storage System market is projected to grow at a CAGR of 14.5% during 2017-23. However, energy storage systems market is still in its initial phase of deployment in most of the European countries on account of lack of common policy framework across different countries which is creating uncertainties among companies and investors to invest in technologies and R&D.

Power utilities is the biggest application area for energy storage systems as high initial investments are required for large scale storage systems and also these have better access to energy infrastructure. However, energy storage in residential sector is gaining popularity in the European countries such as Germany, Italy and UK due to government subsidy on installing residential solar plus storage systems.

The report thoroughly covers the Europe energy storage systems market by technologies, applications and countries.
