GCC Oil & Gas Pipeline Leak Detection Market (2016-2022): Market Forecast by Technologies (Acoustic/Negative Pressure Wave, Extended Real-Time Transient Model (E-RTTM), Mass Balance + PPA and Fiber Optic Cable), Applications (Onshore and Offshore) and Countries (Saudi Arabia, UAE, Qatar, Kuwait, Oman and Bahrain)

GCC countries are the major exporters of crude oil and natural gas in the world. GCC countries are investing billions of dollars for development of oil & gas fields to increase the production. These developments would spur the expansion of both onshore and offshore pipeline network. With the expansion of pipeline network in GCC region, need for reliable and cost effective leak detection system would be witnessed, which would fuel the market for oil & gas pipeline leak detection system.

According to 6Wresearch, GCC Oil & Gas Leak Detection System (LDS) market is projected to grow at a CAGR of 6.52% during 2016-22. Saudi Arabia and UAE are the key revenue generating countries in entire GCC region. In GCC, acoustic/negative pressure wave leak detection system accounted for major revenue share in the overall market in 2015, with Saudi Arabia being the largest contributor. Acoustic/negative pressure wave leak detection system is expected to maintain its dominance throughout the forecast period. Amongst all applications, onshore pipeline segment captured key share in the overall GCC Oil & Gas Leak Detection market due to existence of large pipeline network on land.
