GCC Video Surveillance Storage Market (2017-23): Market Forecast by Product Device (SAN, DAS and NAS), Deployment (Cloud, Hybrid and On-Premise), Verticals (Government & Transportation, Retails, Enterprise & Data Centers, Residential, Healthcare & Hospitality, BFSI and Others), Countries (Saudi Arabia, Bahrain, Oman, UAE, Qatar and Kuwait) and Competitive Landscape

Over the last few years, the GCC region registered healthy growth in the video surveillance market. The region recorded positive installation of video surveillance systems owing to growing security concerns, rise in government spending and burgeoning IT infrastructure. Within video surveillance market, the IP video surveillance segment posted highest growth. A proliferation of IP-based network cameras led to a rise in demand for storage systems. Rising need for data storage, security concerns due to upcoming global events (such as World Expo in Dubai, FIFA World Cup in Qatar) as well as technological & innovation advancements in storage solutions are expected to fuel the growth of video surveillance storage systems in the GCC region.

According to 6Wresearch, GCC Video Surveillance Storage market is projected to grow at a CAGR of 8.5% during 2017-23. Countries such as Saudi Arabia and Kuwait have experienced a setback in video surveillance storage market in the last two years due to decline in oil prices. However, the market is expected to recover from 2017 onwards. Expansion and construction of new hotels, shopping malls and public infrastructures across GCC countries would spur the video surveillance storage market in GCC countries.

Storage Area Network (SAN) is expected to demonstrate the maximum CAGR in the

GCC region over the next six years due to several key factors such as increasing demand for data centers, flexible than other technologies, better speed, options available for cloud computing along with efficient data management solutions.
