## **Abstracts**

India is one of the biggest in-car entertainment markets in Asia-Pacific region. Over the years, India's automobile sector has witnessed tremendous growth; however, during 2012-14, market registered sluggish demand, which affected the sales of passenger car segment in the country. This resulted into weaker demand for in-car entertainment systems. However, with the recovery of sales of passenger vehicle segment the demand for in-car entertainment systems would surge in the coming years.

According to 6Wresearch, India In-Car Entertainment market revenue is projected to grow at a CAGR of 5.3% during 2015-21. In India's in-car entertainment market, speaker and head unit segments accounted for majority of the market revenue. However, in the forecast period, higher growth of infotainment systems would be witnessed in the country.

OEM market accounted for major revenue share in the overall market and its share is expected to increase further in the forecast period. On the other hand, aftermarket revenue is primarily generated from mid-size and small car segments.
