India Industrial Valves Market (2017-2023): Market Forecast By Technology (On-Off Valve and Control Valve) , By Valves Type (Ball, Butterfly, Plug, Gate, Diaphragm, Globe, Angle and Choke), By Application (Oil & Gas Refining (Upstream, Midstream, and Downstream), Petrochemical, Chemical and Fertilizers, Power and Other Industries) and Competitive Landscape

Increasing industrialization, growing industrial pipeline infrastructure as well as rise in the number of regional valves manufacturers are some of the key factors which are driving the growth of industrial valves market in India. Additionally, policies such as 100% FDI in petroleum products & pipeline sector along with capacity expansion by the existing industries are also expected to boost the demand for industrial valves in the country.

According to 6Wresearch, India industrial valves market is projected to reach \$3.0 billion by 2023. In the coming years, industrial valves market is expected to post significant growth, attributed to new industrial infrastructure development projects, repair & renovation of existing industries, and expansion in the gas pipeline network.

Oil & Gas application sector captured major revenue share in 2016 followed by Power and Petrochemical, Chemical & Fertilizers (PCF); this was primarily driven by rising industrial valves application in Oil & Gas- downstream sector. With 21 refineries, India is one of the largest countries that accounts for major refineries, which creates several opportunities for valve manufacturers. Also, with upcoming projects such as exploration of Oil & Gas in Gujarat by GAIL is likely to post growth in industrial valves market over the coming years.
